PREFACE

1 INTRODUCTION **1**

1. Appraisal of Reasoning *1*
2. The Formal Approach *3*
3. Logical Truth and Logical Falsehood *5*
4. Validity and Inconsistency *7*
5. Logical Truth and Logical Falsehood Revisited *10*

PART 1 THE LOGIC OF STATEMENTS **15**

2 VALIDITY AND LOGICAL TRUTH **17**

1. Statements *17*
2. The Official Idiom and Symbolic Paraphrase *22*
3. Derivations and Validity *27*
4. Subderivations and Logical Truth *32*
5. Rules of Inference and Some Applications *37*

3 INVALIDITY AND CONSISTENCY **50**

1. Counterexamples *50*
2. A Reduction of the Intelim Rules *52*
3. Working Inside Conjunctions and Alternations *54*

4. The Tableau Rules 58
5. Construction of Tableau Sequences 59
6. Derivations and Counterexamples 62

PART II THE LOGIC OF GENERAL TERMS 67

4 VALIDITY AND LOGICAL TRUTH 69

1. General Terms and Categorical Statements 69
2. Quantifiers and Variables 73
3. Grammar of Quantificational Logic 78
4. Domains of Discourse 83
5. Intelim Rules for Quantifiers 88
6. Arguments Involving Quantifiers 96
7. Logical Truths Involving Quantifiers 102
8. Relations, Identity, and Numerical Statements 106

5 INVALIDITY AND CONSISTENCY 114

1. Further Reduction of the Intelim Rules 114
2. Working Inside Quantifiers 116
3. Further Tableau Rules 119
4. Revised Construction of Tableau Sequences 120
5. Construction of Counterexamples 123

PART III THE LOGIC OF SINGULAR TERMS 127

6 UNANALYZED SINGULAR TERMS 129

1. Singular Terms and Variables 129
2. Inference Rules for Unanalyzed Singular Terms 131
3. Arguments and Logical Truths Involving Unanalyzed Singular Terms 137
4. Tableau Rules for Unanalyzed Singular Terms 144

7 ANALYZED SINGULAR TERMS 148

1. Arguments for Definite Descriptions 148
2. Definite Descriptions and the Official Idiom 150
3. The Russell-Meinong Debate 152
4. Intelim Rules for Definite Descriptions 157

PART IV FINITE METALOGIC 163

8 METATHEORY OF THE LOGIC OF STATEMENTS 165

1. Problems of Metalogic 165
2. Statements and Truth-Values 166
3. Logical Truth and Validity 169
4. The Soundness of the Logic of Statements 173
5. The Completeness of the Logic of Statements 174

9 METATHEORY OF FREE LOGIC 178

1. Sentences and Models 179
2. Uses of Models 181
3. Logical Truth and Validity 184
4. The Soundness of Free Logic 188
5. The Completeness of Free Logic 189
6. Remarks Concerning Non-empty Domains and Identity 193
7. Remarks on the Semantics of Free Description Theories 194

PART V PHILOSOPHICAL IMPLICATIONS AND APPLICATIONS OF FREE LOGIC 197

10 PHILOSOPHICAL IMPLICATIONS AND APPLICATIONS OF FREE LOGIC 199

1. Are There Non-existents? 199
2. Do Free Description Theories Necessarily Suffer from Scope Problems? 200
3. Is Free Logic Extensional? 203
4. Applications of Free Logic 205
5. Uses of Definite Descriptions 206
6. Singular Terms in Mathematics 209
7. Intensional Discourse 211
8. Quantifiers and Existence 216
9. Presuppositions 219
