Preface *ix*

Introduction *1*

PART I MULTIPLE AND SINGLE CONCLUSIONS

1 Single-conclusion calculi

1.1 Consequence *11*
1.2 Rules of inference *21*
1.3 Sequence proofs *25*

2 Multiple-conclusion calculi

2.1 Consequence *28*
2.2 Compactness *36*
2.3 Rules of inference *39*

3 Tree proofs

3.1 Definition *42*
3.2 Extended proofs *47*
3.3 Adequacy *51*

4 Axiomatisability

4.1 Multiple-conclusion calculi *57*
4.2 Single-conclusion calculi *62*
4.3 Decidability *69*

5 Counterparts

5.1 The range of counterparts *72*
5.2 Compactness *75*
5.3 Axiomatisability *80*
5.4 Sign *82*
5.5 Disjunction *90*

6 Infinite rules

6.1 Infinite rules and proofs *95*
6.2 Marking of theorems *98*

PART II GRAPH PROOFS

7 Graph arguments

7.1 Arguments 105
7.2 Graphs 108
7.3 Premisses and conclusions 111
7.4 Validity and form 114
7.5 Subproofs 123
7.6 Symmetry 129

8 Kneale proofs

8.1 Developments 133
8.2 Validity 137
8.3 Inadequacy 140

9 Cross-reference

9.1 Junction and election 148
9.2 Cross-referenced Kneale proofs 154
9.3 Cross-referenced circuits 158
9.4 Other non-abstract proofs 163

10 Abstract proofs

10.1 Cornered-circuit proofs 167
10.2 Conciseness 174
10.3 Relevance 181
10.4 Articulated tree proofs 187
10.5 Abstract proofs in general 190

11 Single-conclusion proofs

11.1 Single-conclusion arguments 194
11.2 Proofs with circuits or corners 198
11.3 Articulated sequence proofs 202
11.4 Hilbert proofs 206

12 Infinite proofs

12.1 Infinite arguments 212
12.2 Kneale proofs 219
12.3 Cornered-circuit proofs 232
12.4 Marking of theorems 236

PART III MANY-VALUED LOGIC

13 Many-valued calculi

13.1 Definitions 245
13.2 Examples 247
13.3 Compactness 251

14 Matrices

14.1 Matrix functions 256
14.2 Separability 258
14.3 Equivalence 262
14.4 Monadicity 265

15 Many-valuedness

15.1 Cancellation 270
15.2 Compact calculi 273
15.3 Stability 277

16 Counterparts

16.1 Many-valued counterparts 283
16.2 Principal matrices 293

17 Categoricity

17.1 Multiple-conclusion calculi 297
17.2 Examples 302
17.3 Single-conclusion calculi 306

18 Two-valued logic

18.1 Axiomatisation 312
18.2 Duality 314
18.3 Counterparts 316

19 Axiomatisation

19.1 Finite axiomatisation 325
19.2 Monadic matrices 326
19.3 Examples 330
19.4 Limitations 334
19.5 The general case 337
19.6 Further examples 341
19.7 Single-conclusion calculi 347
19.8 Rosser and Turquette 355

PART IV NATURAL DEDUCTION

20 Natural deduction

20.1 Proof by cases *361*
20.2 Classical predicate calculus *366*
20.3 Intuitionist propositional calculus *374*

Bibliography *386*

Index *390*
