Notation xiii

1. *Cartesianism, behaviourism and the philosophical context*
   1.1 After behaviourism 1
   1.2 The background 3
   1.3 The structure of the book 5
   1.4 Neglected topics 7

Part I *Belief*

2. *A theory of the mind*
   2.1 Overview 11
   2.2 Functionalism: an introduction 16
   2.3 Computation and representation 18
   2.4 States and dispositions 25
   2.5 States, events and causes 30
   2.6 Input, output and throughput 32
   2.7 Summary 36

3. *Belief and decision*
   3.1 Overview 39
   3.2 Decision theory: the general form 41
   3.3 Causal decision theory 44
   3.4 The theory in action 51
   3.5 Decision and preference 54
   3.6 Changing your mind 59

4. *Computation*
   4.1 Overview 73
   4.2 Truth conditions and decision theory 75
   4.3 Computational structure 81
   4.4 Output and input 90

4.5 Regularity 94
4.6 Beliefs and sentences 97

5. *Truth conditions*
5.1 Overview 100
5.2 Decision and truth 101
5.3 Phenomenological problems 109
5.4 Truth conditions and causality 112
5.5 Summary 117

Part II *Meaning*

6. *Realism and truth-theory*
6.1 Overview 123
6.2 Meaning and truth conditions 124
6.3 Tarski's truth-theory 130
6.4 Truth conditions are not enough 140

7. *Assertion*
7.1 Overview 143
7.2 Utterance 144
7.3 Sentences and beliefs 147
7.4 Conventions of expression 148
7.5 Sentences and computational structure 152
7.6 Summary 156

Part III *Conditionals*

8. *Indicative conditionals*
8.1 Subjunctive and indicative conditionals 161
8.2 Material conditionals 166
8.3 Adams' Hypothesis 173
8.4 Lewis and the conversational implicature defence 176
8.5 Jackson and the conventional implicature defence 185

9. *Truth and triviality*
9.1 Overview 192
9.2 The proof itself 194
9.3 Lewis' rationale 196
9.4 Giving up simple conditionalisation 198

9.5 Adams' proof 201
9.6 Carlstrom and Hill 202
9.7 Compounds of conditionals 205
9.8 A final argument 210
9.9 Conclusion 212

10. *Logic without truth*
10.1 Adams and the validity of conditional inferences 213
10.2 Impossible antecedents 219
10.3 Problems of inference 222
10.4 Adams' logic 227
10.5 Conditional logic 231

11. *Generalising the probabilistic semantics of conditionals*
11.1 Overview 234
11.2 Ramsey conditionalisation 235
11.3 Minimal evidence 237
11.4 Embedded conditionals 239
11.5 Semi-indicatives 246
11.6 Conclusion 251

Epilogue 253
Bibliography 254
Index of names 262
Index of key terms 264
