	Introduction	i
1	Propositional attitudes in the theory of mind	6
	1.1 The belief–desire theory	6
	1.2 Interpretations of the belief–desire theory	9
	1.3 Psychophysical correlations and reduction	15
	1.4 Psychophysical laws and psychophysical reduction	20
2	Explicating attitude-ascriptions	26
	2.1 Beliefs as relations	26
	2.2 The propositional theory	29
	2.3 Semantic relation theories	31
	2.4 Beliefs and desires without that-clauses	38
	2.5 Philosophical explication	41
3	Functional theories	44
	3.1 Functional theories: a general characterization	44
	3.2 David Lewis’s theory of theory interpretation	46
	3.3 The logical form of functional theories: a first approximation	48
	3.4 The multiple realization of functional theories	50
4	How to interpret ascriptions of beliefs and desires	57
	4.1 Interpreting belief-ascriptions: preliminaries	57
	4.2 Interpreting belief-sentences: the formal treatment	59
	4.3 Interpreting belief-ascriptions: propositions as indices of systematic roles	63
	4.4 Input conditions and observational beliefs	65
	4.5 Unique systematic roles for non-observational beliefs	71
	4.6 Unique functional roles for beliefs	74
	4.7 Systematic roles for B-type beliefs	81
	4.8 Truth conditions and the definition of ‘believes’	85

4.9	Wanting, willing and acting	86
4.10	The class of belief–desire theories	93
5	Beliefs about particulars	97
5.1	Beliefs about perceived particulars	98
5.2	The tenses of beliefs	107
5.3	Beliefs about oneself	113
6	Objectively determinate beliefs and our knowledge of them	118
6.1	Functional role and the determinacy of content	118
6.2	Are indices eliminable?	122
6.3	The epistemology of belief–desire ascription	127
6.4	Linguistic evidence and fine-grained beliefs	139
7	Intentionality without intensions	142
7.1	Attitudes and propositions	142
7.2	Propositions eliminated from the functional theory	144
7.3	Defining ‘true’	153
7.4	Truth conditions on Twin Earth	159
7.5	The meaning of that-clauses	164
7.6	Possible-world truth conditions	164
7.7	Redundancy and correspondence	166
8	Why truth?	171
8.1	Two unhelpful answers	171
8.2	The salience of T	174
8.3	Reliability and the determinacy of truth conditions	175
8.4	Truth and the application of the functional theory	194
9	Language and meaning	203
9.1	The language of thought	205
9.2	Natural language meaning	208
9.3	Propositional attitudes as the basis of meaning	210
9.4	Communication theories of semantic properties	212
9.5	Non-cognitive models of language learning	213
9.6	A simple cognitive model of language learning	217
9.7	Languages and truth theories	219
9.8	What is a theory of meaning?	222
9.9	The determinacy of reference	225
10	Public language semantics	238
10.1	Meaning and communication intentions	238

10.2	Uncovering the structure of communication intentions	242
10.3	The reality and relevance of the alleged intentions	247
10.4	Literal meaning: semantics for a public language	253
	References	261
