

# CONTENTS

Preface	v
Introduction	1
<b>1. ON THE NATURE OF NUMBER</b>	<b>13</b>
Science and Mathematics	13
Number	14
The Peano Axioms	22
Logical Truth	26
Models and Turing Machines	38
Number Theory	43
<b>2. GEOMETRY</b>	<b>48</b>
The Elements	48
Kant and the Forms of Intuition	56
Conventionalism	63
Analytic Geometry	67
The Erlangen Program	68
Pythagorean Geometry	70
<b>3. MOTION AND ANALYSIS</b>	<b>77</b>
The Geometry of Motion	78
The Calculus	81
The Dedekind Cut	84

Complex Numbers and Vectors	87
Continuity	91
Analytic Functions and Fourier Series	92
The Nature of Mathematics: Universals	96
4. MEASUREMENT	104
Observation and Measurement	105
On Basic Measurements	106
The Measurement of Time	110
Measurement and Invariance	112
Relational Patterns	115
Measurement and Its Validation: Operationalism	118
Measurement and Information	125
5. LAWS OF MOTION	132
Law and Modern Science	132
Aristotle on Motion	133
The Science of Mechanics	140
Determinism and Causality	144
The Isolated System: Essence and Accident	156
6. CHANCE AND PROBABILITY	165
Law and Chance	166
Logical Preliminaries	168
The Mathematics of Probability	174
Probability and Determinism	180
The Measurement of Probability	181

Symmetry and Independence	186
The Frequency Interpretation	191
Statistically Isolated Systems	194
7. ESSENCE AND CONTEXT IN TWENTIETH-CENTURY PHYSICS	197
An Anticipation	197
Relativity and Space-time	200
Quantum Physics	209
States	212
Transitions	213
Identity	219
The <i>Scala Naturae</i>	222
8. THE IDEA OF ORDER	230
L'ordre Naturel	230
Thermodynamics	234
Statistical Mechanics	237
The Maxwell Demon	248
Information, Order, and Free Energy	251
The Arrow of Time	264
9. PROBABILITY AND CREDIBILITY	274
The Probable and the Non-probable	275
Decisions and Information Theory	278
Credibility and Priority	283
The Inductive Maze and a Theorem on Progress	292
The System of Knowledge	299

The Justification of Probable Inference	301
Analogy and Category	304
10. THREE EVOLUTIONARY STAGES	311
The Demons	311
Self-reproduction	313
Stage One: From Molecule to Cell	324
Stage Two: The Verb "to Learn"	330
Stage Three: Culture	335
11. THE THEORY OF THE SOUL	339
Human Nature	339
Human Variability	344
Self-consciousness	348
Purposive Behavior	351
Observational Problems in Psychology	361
Problems of Freedom	371
12. ETHICS	376
Model-building	377
Choice and the Fundamental Theorem of Ethics	380
The Gardens	394
Responsibility	402
13. ECONOMIC THEORY AND SOCIAL CHOICE	407
Value as Substance	408
Value as Individual Preference	418

CONTENTS

xiii

Value as Social Choice	424
Conclusion	433
Bibliographical Comment	439
Index	449
