INTRODUCTION	xi
1. FUNCTION AND CONCEPT	I
(i) The need for a theory	
(ii) Function, argument and value	
(iii) Value-ranges and equality of functions	
(iv) Equations and descriptions	
(v) Concepts and their extensions	
(vi) Functions of many arguments, truth-functions and levels of functions	
2. CONCEPT AND OBJECT	19
(i) The distinction between concepts and objects	
(ii) Concepts, ideas and meanings	
(iii) Objects and numbers	
(iv) Objectivity and reality	
(v) Existence and objectivity	
3. SUBJECT AND PREDICATE	35
(i) Proper names and concept-words	
(ii) The concept-object distinction; grammatical criteria	
(iii) Logical subjects and predicates	
(iv) The copula, identity, negation	
(v) Subject-predicate analysis	
4. NAME AND DESCRIPTION	47
(i) Signs	
(ii) Names, existence and uniqueness	
(iii) Definite descriptions and presupposition	
(iv) Definite descriptions and identity	
(v) Frege <i>versus</i> Russell	
5. INCOMPLETENESS AND PREDICATION	61
(i) The concept <i>Horse</i>	
(ii) Functions and argument positions	
(iii) Predicativity and the sentence	
(iv) Completeness and meaning	

6. SENSE AND REFERENCE	74
(i) The early theories	
(ii) Sense and reference	
(iii) Whole and part	
(iv) Concepts and predicative expressions	
(v) Some reasons for the theory	
(vi) The translation of <i>Bedeutung</i>	
7. THE NOTION OF SENSE	92
(i) Word-sense and sentence-sense	
(ii) Expression, understanding and communication	
(iii) Properties and senses	
(iv) The meanings of words in their contexts	
(v) Language, thought and meanings	
8. THOUGHT AND JUDGEMENT	109
(i) The early theory	
(ii) Assertion, truth and the indicative	
(iii) Judging and apprehending	
(iv) Negation, thoughts and truth	
(v) Thoughts; their objectivity and sense	
(vi) Thinking, calculation and intuition	
9. TRUTH AND MEANING	125
(i) Sentences, their sense and reference	
(ii) Truth as an object of reference	
(iii) Truth, fact and objectivity	
(iv) Correspondence and picture-truth	
(v) Frege's theories of meaning and truth	
10. LANGUAGE AND SYMBOLISM	140
(i) Form and content	
(ii) Signs, figures and words	
(iii) Rules, sentences and meaning	
(iv) Games and sciences	
(v) Correspondence and picturing	
(vi) Word-languages and symbol-scripts	
11. SCIENCE AND KNOWLEDGE	160
(i) Proof and self-evidence	
(ii) Laws, generality and analyticity	
(iii) The conditions for definition	
(iv) Simplicity and indefinability	
(v) Logic and arithmetic as science	

CONTENTS

ix

12. THE NATURE OF NUMBERS	178
(i) Extensions and classes								
(ii) Some rejected definitions of number								
(iii) The <i>Grundlagen</i> definition of number								
(iv) Russell's paradox and the fundamental law of logic								
(v) Numbers as extensions								
(vi) Frege's Platonism								
FURTHER READING	196
