Introduction: Framing the Issue	1
I. Lessons from Urban America	5
Lesson 1: The real city is the total metropolitan area— city and suburb.	5
Lesson 2: Most of America's Blacks, Hispanics, and Asians live in urban areas.	7
Lesson 3: Since World War II, all urban growth has been low-density, suburban style.	7
Lesson 4: For a city's population to grow, the city must be "elastic."	9
Lesson 5: Almost all metro areas have grown.	12
Lesson 6: Some central cities have grown; others have shrunk.	14
Lesson 7: Low-density cities can grow through in-fill; high-density cities cannot.	15
Lesson 8: Elastic cities expand their city limits; inelastic cities do not.	16
Lesson 9: When a city stops growing, it starts shrinking.	17
Lesson 10: Elastic cities "capture" suburban growth; inelastic cities "contribute" to suburban growth.	20
Lesson 11: Bad state laws can hobble cities.	20
Lesson 12: Neighbors can trap cities.	22

Lesson 13: Old cities are complacent; young cities are ambitious.	23
Lesson 14: Racial prejudice has shaped growth patterns.	28
Lesson 15: Inelastic areas are more segregated than elastic areas.	29
Lesson 16: Inelastic areas that segregate Blacks segregate Hispanics.	31
Lesson 17: City-suburb income gaps are more of a problem than overall income levels in metro areas.	31
Lesson 18: Fragmented local government fosters segregation; unified local government promotes integration.	33
Lesson 19: Dispersed and fragmented public education is more segregated than centralized and unified public education.	35
Lesson 20: The global economy sets the rules, but local areas can decide how to play the game.	38
Lesson 21: The smaller the income gap between city and suburb, the greater the economic progress for the whole metropolitan community.	40
Lesson 22: Poverty is more concentrated in inelastic cities than in elastic cities.	41
Lesson 23: Elastic cities have better bond ratings than inelastic cities.	43
Lesson 24: Rebuilding inner cities from within has not happened.	44
Conclusion	47
II. Characteristics of Metropolitan Areas	51
The Point of No Return	75
Cities without Suburbs	78
III. Strategies for Stretching Cities	85
Three Strategies	85

Urban "Triage"	87
Metro Government: A Definition	89
State Government Initiatives	90
Federal Government Initiatives	102
Citizen Initiatives	116
IV. Conclusions and Recommendations	121
Afterword	127
Appendix: Central Cities and Metro Areas by Elasticity Category	131
