<i>Translator's preface</i>	<i>xii</i>
Introduction: Ecosophy T – from intuition to system.	1
– by David Rothenberg	
1 Beginning with intuitions	2
2 Interpretation and precisation in Naess's philosophy	5
3 Clarification of terms in translation	7
(a) Milieu/environment	7
(b) Self-realisation	8
(c) Derivation	10
(d) Identification	10
(e) Intrinsic value	11
(f) Depth	12
4 Where do we place deep ecology?	14
1 The environmental crisis and the deep ecological movement	23
1 The gravity of the situation	23
2 Production and consumption: ideology and practice	24
3 Our ecological knowledge is severely limited; ecopolitical consequences of ignorance	26
4 The deep ecology movement	27
5 A platform for the deep ecology movement	29
6 How the themes of deep ecology are presented in what follows	32
2 From ecology to ecosophy	35
1 The terms ecology, ecophilosophy, ecosophy	35
(a) Ecology	35
(b) Ecophilosophy and ecosophy	36

(c)	The dangers of 'ecologism': seeing ecology as the ultimate science	39
2	Normative evaluation	40
(a)	Objective science cannot provide principles for action	40
(b)	Norms and hypotheses; Normative systems	41
(c)	The generalist in us	44
(d)	Conservation biology	45
3	Objective, subjective, and phenomenological descriptions of nature	47
4	Primary, secondary, and tertiary qualities: do they exist in nature?	51
5	Protagorean 'Both-and' theory	54
(a)	The relational field	54
(b)	The world of concrete contents	56
6	Gestalts and gestalt thinking	57
7	Emotion, value, and reality	63
8	From emotion to evaluation	65
3	Fact and value; basic norms	68
1	Announce your value priorities forcefully	68
2	Total systems; norm system models in pyramidal form	72
3	Ecological system thinking	78
4	The search for ultimate goals: pleasure, happiness, or perfection?	80
5	Self-realisation as top norm and key term for an ultimate goal	84
4	Ecosophy, technology, and lifestyle	87
1	Ecosophical consciousness and lifestyle	87
2	Mutual help towards ecosophical lifestyle: 'The Future in Our Hands'	88
3	Effects of change of mentality	91
4	Technology and lifestyle	92
(a)	The non-existence of purely technical advance	93
(b)	'The environmental crisis can be technically resolved . . .'	96
(c)	Soft technology and ecosophy	97
(d)	The invasion of hard technology in the Third World	100
(e)	Ecosophy and technology: a summary	102

5	Economics within ecosophy	104
1	The contact with total views	104
2	The neglect of economics within the deep ecological movement	105
3	'as seen from a purely economic standpoint . . .'	106
4	An economic policy system fragment	107
5	Gross National Product (GNP)	110
6	Arguments for ignoring GNP in the industrialised countries	111
	(a) Historical background for the overevaluation of GNP	111
	(b) GNP is not a measure of welfare: why not?	112
	(c) GNP growth favours hard and distant technologies	113
	(d) GNP growth favours wants, not needs	113
	(e) GNP discriminates against people working at home	114
	(f) GNP growth supports irresponsible and unsolidaric resource consumption and global pollution	114
	(g) The irrelevance of economic growth	114
	(h) Misplaced attempts at salvation of GNP	114
	(i) Employment and growth	116
7	Basic notions in economic welfare theory	116
	(a) The notion of economic welfare	116
	(b) From welfare theory to normative systems	119
	(c) Welfare to Self-realisation: from W to T	120
8	Life quality research: deep interviews	121
9	Shadow-pricing nature	123
10	Summary	128
6	Ecopolitics within ecosophy	130
1	The ecological movement cannot avoid politics	130
	(a) All is politically relevant, but not all is politics	130
	(b) Power analysis is necessary	131
	(c) The politicisation of conservation	132
2	The three poles of the political triangle – the blue, the red, and the green; the limitations of triangular analysis	133
3	Checklist of ecopolitical issues and their expansion	135
4	More comments on the basic ecopolitical areas of pollution, resources, and population	138
	(a) Pollution	138
	(b) Resources	139
	(c) Population	140

5	Strengthening the local and the global	141
	(a) Self-determination	141
	(b) Self-reliance	143
	(c) The realisation of local communities	144
6	Direct action; norms of Gandhian nonviolence	146
7	The rich and the poor countries: from exploitation to mutual aid	150
8	Critiques of the <i>Limits to Growth</i> approach	151
9	Are Green political parties desirable?	153
10	The deep ecological movement and the big political issues	156
	(a) The basic ideological choices	156
	(b) Socialism and ecosophy	157
11	Bureaucracy	158
12	The deep ecological movement and the peace movement	160
13	Green political programmes from day to day	160
14	Concluding remarks	162
7	Ecosophy T: unity and diversity of life	163
1	The universal right to self-unfolding and the correlative intrinsic value of every life form	164
	(a) Ecosophy ties together all life, and all nature	164
	(b) 'The unfolding of potentialities is a right.'	164
	(c) Life as a vast historical process	165
	(d) The universal right to live and blossom	166
	(e) The uniqueness of humankind must not be underestimated	169
2	Identification, oneness, wholeness, and Self-realisation	171
	(a) Identification and alienation; ideas of oneness and wholeness	171
	(b) Identification and Self-realisation	173
	(c) 'That which is not of value to any human being is of no value at all'	176
	(d) <i>Friluftsliv</i> : exuberance in nature	177
3	Cruelty in nature; the tragedy and the comedy of life	183
4	An historical perspective I: the Bible	183
5	An historical perspective II: from Plotinus to Descartes	189
6	Our self-respect is not solely due to our own significance: the Milky Way also stimulates respect	191
7	Nonviolence and the philosophy of oneness	193

8	The systematisation of the logically ultimate norms and hypotheses of Ecosophy T	196
(a)	The idea of models of logical relations	196
(b)	Formulation of the most basic norms and hypotheses	197
(c)	Norms and hypotheses originating in ecology	199
(d)	The meaning of diversity, complexity, and symbiosis in the context of Self-realisation	200
(e)	Derivation of the norms of the local community	204
(f)	Minimum conditions and justice: classes; exploitation	206
(g)	The overview of Ecosophy T in diagram form	208
9	The future of the deep ecological movement	210
	Bibliography	214
