Preface vii

Part I

Why Should We Be Concerned? **1**

1. *Social and Environmental Health: Risks and Vulnerabilities of Global Pollution and Depletion* 3

Environmental Unsustainability: Withdrawals and Additions 3

From Local Problems to Global Problems 6

The Social Implications of Ecological Disorganization 10

Why Should We Protect the Environment? Competing Views and Values 16

Motives for Studying Social-Environmental Relationships 20

SELECTED REFERENCES 20

2. *Society as the Enemy of the Environment: Battle Plans for the Assault* 22

Living within Ecological Limits: A Historical Ideal 22

Exceeding Ecological Limits: From Preindustrial to Postindustrial Patterns 24

“Overcoming” Limits: Successive Waves of Industrial Revolutions 25

Emergent “Environmental Science” and the “Return” of Ecological Limits 31

Rio and the Struggle to Define Global Environmental
Disorganization 37

SELECTED REFERENCES 39

Part II

How Does Environmental Disorganization Get Created? 43

3. *Economic Organizations in the Treadmill of Production:
How and Why They Create Environmental Disruptions* 45
- The Industrial Logic: An Introduction 45
- The Low-Regulation Scenario: Typical Environmental
Impacts 46
- Direct Environmental Impacts 46
- The Low-Regulation Scenario and the Logic of
Profitability 48
- THE SPREAD OF COMPETITION* 48
- COMPETITION AS A CONTEXT FOR THE LOW-REGULATION
SCENARIO* 49
- MANAGERIAL DECISION MAKING UNDER COMPETITION* 51
- The High-Regulation Scenario and the Logic of Political
Control 54
- THE SPREAD OF REGULATION* 54
- THE INDUSTRIAL CHALLENGE POSED BY REGULATION* 56
- MANAGERIAL DECISION MAKING UNDER REGULATION* 60
- Ecological Implications of Economic Organizations 64
- SELECTED REFERENCES* 65
4. *Treadmill Predispositions and Social Responses: Population,
Consumption, and Technological Change* 68
- Directions of and Motives for Technological Change 68
- Expanding Production as a Social Choice 70
- Population and Production: The Complex
Connections 76
- Employment, Wages, and the Treadmill: Labor and
Technology 80
- Who's In Charge? Private Capital, Government, and/or
Labor? 86
- SELECTED REFERENCES* 89

5. *Lubricating the Treadmill: The Role of Institutions* 92

The Influence of Institutions: Interdependency with the Treadmill 92

Knowledge Creation and Dissemination: Economic versus Ecological Realities 94

Cultural Influences on Contemporary Workers: From Families to Labor Unions 100

Cross-Pressures on the Modern State: Capitalist versus Socialist Experiences 106

SELECTED REFERENCES 112

Part III

What Has Been Done? What Can Be Done? 117

6. *What Can I Do about Environmental Problems?* 119

Socioeconomic Strategies 119

DECREASING EXPECTATIONS IN CAREERS 119

CREDIT: LESS IS MORE ENVIRONMENTALLY PROTECTIVE 123

CONSUMPTION AND REPRODUCTION: HIGHER QUALITY AND LOWER QUANTITY 127

Political-Economic Strategies 133

RECYCLING AND REUSE: OPTIONS FOR BUYING AND RECIRCULATING 133

POLITICAL SUPPORT FOR ENVIRONMENTAL TAXATION AND JOB CREATION 136

SOCIAL MOVEMENTS: SUPPORT FOR PARTICIPATION IN THEM 138

SELECTED REFERENCES 140

7. *Resisting the Treadmill of Production: Environmental Movements* 143

Conservation and Preservation Movements 143

Modern Environmental Movement Organizations: Science versus Politics 145

Diversity among Voluntary Movements versus the Image of Environmentalism 149

Distributing Environmental Protection Costs: A Social Challenge to Environmentalists 154

SELECTED REFERENCES 162

8. *Opting Out or Waiting to Enter?: The Underdeveloped Countries* 165

Underdevelopment and the Nations of the South: The Absence of a Treadmill? 165

MODERNIZATION DRIVES: THE FUTILE SEARCH FOR A SOUTHERN TREADMILL 167

Appropriate Technology: A Southern Alternative to the Treadmill in the North? 173

Alternatives to the Treadmill: China and Tanzania 176

World Contexts of Appropriate Technology: Precursor of Sustainable Development? 179

GREEN REVOLUTION IN INDIA 182

RURAL DEVELOPMENT IN POST-EARTHQUAKE GUATEMALA 182

RURAL DEVELOPMENT IN SRI LANKA 184

SOAP-MAKING IN MALI 185

Technologies and Social Relations 185

External versus Internal Constraints on Treadmill Alternatives 187

Appropriate Technology as an Adjunct to the Treadmill 189

Modernization, Appropriate Technology, and Treadmill Reform 194

SELECTED REFERENCES 195

9. *Ecological Sustainability: Of What? For What?* 199

Ecological Sustainability: Roots and Rationales 199

ECONOMIC GROWTH AND ECOLOGICAL LIMITS 199

HUMAN ECONOMIES AND NATURAL RESOURCES 202

THE DIMENSIONS OF SUSTAINABILITY 203

Sustainability Goals versus Treadmill-Sustaining Pressures 204

Preserving the Environment for Other Social Uses 211

Protecting Ecosystems for Other Species: Sustainable Ecology 216

Can We Do It All? Can We Do It at All? 219

SELECTED REFERENCES 222

Epilogue:
International Words and Deeds **225**

10. *The Road to and from Rio: Sustainable Development
 versus the Politics of the Treadmill* 227
- The View from Rio: Dilemmas in Evaluating
 Environmental Changes 227
- The Enduring Quality of Environmental Tensions 231
- Conflict and Coalition 233
- WHY IS CONFLICT UNAVOIDABLE?* 233
- INTERNATIONAL CONFLICT AND COALITION* 234
- NATIONAL CONFLICT AND COALITION* 236
- REGIONAL CONFLICT AND COALITION* 236
- LOCAL CONFLICT AND COALITION* 237
- INTERPERSONAL CONFLICT AND COALITION* 238
- INTRAPERSONAL CONFLICT AND ITS RESOLUTION* 239
- Conclusion: The Future Is Wide Open (Within
 Limits) 240
- SELECTED REFERENCES* 241
