CHAPTER I

INTRODUCTION TO MODAL PROPOSITIONAL LOGIC

| | |
|---|----|
| SECTION 0. <i>Historical sketch</i> | 1 |
| § 01. Modalities in Aristotle | 1 |
| § 02. Modalities in traditional logic | 2 |
| § 03. Logical algebra in the XIX th Century | 3 |
| § 04. The Lewis's systems | 4 |
| § 05. Further developments | 5 |
| § 06. Interpretation | 7 |
| SECTION 1. <i>Notations. Recapitulation of non-modal calculus</i> | 8 |
| § 10. Notations | 8 |
| § 11. Criterion for validity of formulas in APC | 9 |
| § 12. List of valid formulas in APC (a -theorems) | 11 |
| § 13. Postulates for APC | 16 |
| § 14. Derivations in APC | 16 |
| § 15. Matrices | 19 |
| § 16. Postulates for the assertoric functional calculus of the first order (AF ¹ C) | 21 |
| § 17. Principal theorems and derived rules proper to AF ¹ C | 23 |
| § 18. Replacement of material by formal connectives in monadic AF ¹ C | 24 |

| | |
|--|----|
| SECTION 2. <i>Heuristical approach to modal propositional logic</i> | 27 |
| § 20. Idea of the auxiliary logic $M''PQ$ | 27 |
| § 21. The calculus $M''PQ$ | 29 |
| § 22. The logic $M''PQC$ | 30 |
| § 23. Postulates suggested by the heuristical correspondence | 31 |
| § 24. Principal theorems and rules about modalities in $M''PQC$ (m -theorems) | 32 |
| § 25. Designations of formulas and rules (S -, s -, S' -, S'' - and S''' - transforms) | 33 |
| § 26. Replacement of material connectives by strict connectives in $M''PQC$ | 34 |
| § 27. Transformations of APC theorems valid in $M''PQC$ (sa -, Sa -, S'a -theorems) | 37 |
| § 28. Transformations of theorems and rules about modalities (sm -formulas) | 40 |
| § 29. Transition from $M''PQC$ to other sets of postulates | 41 |

CHAPTER II

FORMAL SYSTEMS OF MODAL PROPOSITIONAL LOGIC

| | |
|--|----|
| SECTION 3. <i>Systems 1° and 1</i> | 43 |
| § 30. Postulates for system 1° | 43 |
| § 31. Theorems and derived rules (material connectives) in $S 1^\circ$ | 47 |
| § 32. Derived rules in system 1° (strict implication) | 52 |
| § 33. Explicit modalities in $S 1^\circ$ | 55 |
| § 34. General metatheorems for system 1° | 58 |
| § 35. T-theorems in system 1° | 60 |
| § 36. The system 1 | 64 |
| § 37. Theorems proper to system 1 | 65 |
| § 38. No finite characteristic matrix for system 1 | 66 |
| §*39. Alternative set of postulates for system 1 | 66 |

| | |
|--|-----|
| SECTION 4. <i>Systems 2° and 2</i> | 68 |
| § 40. Postulates for the systems 2° and 2 | 68 |
| § 41. Distribution of modalities in S 2°. (First set: Im- plications) | 69 |
| § 42. Factor- and decomposition-theorems in S 2° | 69 |
| § 43. S'a-theorems in S 2° | 71 |
| § 44. Distribution of modalities in S 2° (Second set: Equivalences) | 71 |
| § 45. Strict equivalence in S 2° | 72 |
| § 46. Becker's rules in S 2° | 73 |
| § 47. Theorems provable in system 2 only | 74 |
| § 48. Underivability of formulas in S 2 | 76 |
| § 49. S2-matrices and decision-method for S2 | 77 |
| §*49'. An alternative set of postulates for S2 | 78 |
| §*49''. An alternative set of postulates for S2° | 78 |
| SECTION 5. <i>System 3</i> | 79 |
| § 50. Postulates for system 3 | 79 |
| § 51. Immediate consequences | 80 |
| § 52. Exported theorems and other consequences | 82 |
| § 53. Reduction-theorems | 83 |
| § 54. Reduction of all modalities to 42 | 85 |
| § 55. Implications between modalities | 86 |
| § 56. Underivability of other implications between modalities | 88 |
| § 57. Alternative set of postulates for system 3 | 88 |
| §*58. Proper subsystems of S 3 (Systems 3° and 3*) | 91 |
| SECTION 6. <i>System 4</i> | 92 |
| § 60. Postulates for system 4 | 92 |
| § 61. Reduction of modalities in system 4 | 93 |
| § 62. Theorems and rules valid in system 4 | 95 |
| § 63. Alternative sets of postulates for system 4 | 97 |
| § 64. Various forms of the deduction theorem in system 4 | 102 |
| § 65. L-system equivalent to system 4 | 106 |
| § 66. Decision-procedures for system 4 | 109 |
| §*67. Some alternative sets of postulates for system 4 | 112 |
| §*68. A proper subsystem of S 4 (System 4°) | 113 |

| | |
|--|-----|
| SECTION 7. <i>System 5.</i> | 115 |
| § 70. Postulates for system 5 | 115 |
| § 71. Reduction of modalities in system 5 | 115 |
| § 72. Reduction of modal functions in system 5 | 117 |
| § 73. Alternative sets of postulates for system 5 | 118 |
| SECTION 8. <i>Extensions</i> | 122 |
| §*80. Some extensions of system 1° (Systems T° and T ^x) | 122 |
| § 81. Extension of system 2: System 2' (or T, or M) | 123 |
| § 82. Relations between system 2' and other systems | 124 |
| § 83. Theorems provable in system 2' | 126 |
| §*84. Other systems equivalent to system 2' (Systems S' and M*) | 126 |
| § 85. Extensions of system 2' (Systems 4 ⁿ) | 127 |
| § 86. Extensions of system 3 (System K) | 127 |
| § 87. Extensions of system 4 (Systems 4.1 and 4.5) | 129 |
| § 88. Extensions reducing modal systems to APC | 131 |
| SECTION 9. <i>Extensions (continued)</i> | 133 |
| § 91. Extensions generated by postulates of universal possibility (Systems 6, 7 and 8) | 133 |
| § 94. Postulates of irreducibility | 134 |
| § 95. Propositional variables | 134 |
| § 96. Extensions with bound propositional variables | 137 |
| SECTION *9'. <i>Some other modal systems</i> | 139 |
| §*9'1. Halldén's system 0 | 139 |
| §*9'2. Lemmon's system 0.5 | 139 |
| §*9'3. Shaw-Kwei's systems B and B _n (namely B ₂ or S'3) | 139 |
| §*9'4. Porte's systems Sa, Sb, Sc and related ones | 140 |

CHAPTER III

MODAL FUNCTIONAL LOGIC

| | |
|---|---------|
| SECTION 10. <i>Outline of MFQ, without abstraction</i> | 146 |
| § 101. Atomic propositions in MFQ | 146 |
| § 102. Purely quantified and molecular propositions in MFQ | 147 |
| § 103. Derivation of MFQ-formulas with quantifiers . | 148 |
| § 104. Formulas peculiar to MF^1Q | 149 |
| § 105. Second order modal functional logic and identity | 150 |
| § 106. Transition to an abbreviated MFC calculus . | 151 |
| SECTION 11. <i>Abstracts</i> | 152 |
| § 111. Abstraction | 152 |
| § 112. Abstracts in propositional logic | 153 |
| § 113. Abstracts $\hat{x}M$ | 155 |
| § 114. Abstracts $\hat{x}iM$ | 156 |
| § 115. Abstracts of MF^2Q and identity | 158 |
| § 116. Abstracts $\hat{a}M$ | 159 |
| § 117. Transition from MFQ to MFC | 160 |
| SECTION 12. <i>First-order functional calculus</i> | 162 |
| § 121. Postulates | 162 |
| § 122. Obvious derived theorems | 163 |
| § 123. Modalities with quantifiers | 163 |
| § 124. Functional parallels of weak transformations of MPC | 164 |
| § 125. Theorems restricted to MF^1C | 164 |
| § 126. Rule of replacement | 165 |
| § 127. Deduction theorem | 165 |
| SECTION 13. <i>Identity</i> | 167 |
| § 130. Postulates for identity | 167 |
| § 131. Definitions for both forms of identity | 167 |
| § 132. Immediate consequences | 168 |

| | |
|--|-----|
| § 133. Identity expressed by means of an universal implication | 168 |
| § 134. Identity expressed by means of an existential proposition | 169 |
| § 135. Equivalences between i and I | 170 |
| § 136. Non-identity | 170 |
| § 137. Theorems upon non-identity | 170 |

* APPENDIX

| | |
|---|-----|
| SECTION *14. <i>L-formulations of modal propositional logics, giving decision procedures for the systems S_2, S_3, S_4, S_5 and S_2'</i> | 173 |
| §*141. Systems of Onishi and Matsumoto, related to S_2 , S_3 , S_4 , S_5 and S_2' | 173 |
| §*142. Systems of Kanger, related to S_4 (system 4*), S_5 (system 5*) and S_2' (system t^*) | 178 |
| BIBLIOGRAPHY | 187 |
| INDICES | 217 |
