

TABLE OF CONTENTS

PREFACE	vii
CHAPTER ONE: INTRODUCTION	1
1.1. Two Types of Decision Theory	1
1.2. Rational Decision Theory	3
The Postulates of Rationality	3
Instrumental and Axiological Rationality	5
Rational Solutions	5
Evaluation of the theory	8
1.3. The Structure of Psychological Decision Theory	11
The Subject Matter of the Theory	11
The Language of the Theory	12
The Propositions of the Theory	13
Substantiation of Propositions	14
1.4. The Functions of Psychological Decision Theory	15
The Predictive Function	15
The Explanatory Function	16
The Practical Function	17
1.5. The Book	18
CHAPTER TWO: THE DECISION MAKER	20
2.1. Who is the Decision Maker?	20
2.2. Invariant Properties of the Decision Maker	22
2.3. The Decision Maker as a Goal-Directed System	23
The Nature of Goals	24
Composite Goals	25
The Criteria of Goal-Directed Behaviour	26
2.4. The Memory Systems	27
Long-Term Memory	27
Short-Term Memory	28
External Memory	29
2.5. The Decision Maker as a Serial Processor	29
2.6. A Theoretical Controversy	30
2.7. Conclusion	31

CHAPTER THREE: DECISION TASKS	33
3.1. Decision Task Space	33
Environmental Dimensions	33
Types of Tasks	35
3.2. Risky Tasks	35
A Model of Static Risky Tasks (SRT)	37
The Generalized SRT Model	38
3.3. The Invariants of Risky Tasks	40
Structure of the Alternative	40
Structure of the Hypothesis	41
Consequences of Alternatives	43
3.4. Experiments on Risky Tasks	44
3.5. Conclusion	46
CHAPTER FOUR: THE INTERNAL REPRESENTATION OF RISKY TASKS	48
4.1. Risky Decision Behaviour	48
4.2. Generation of an Internal Representation	50
A Case of Representation Generation	51
The Features of Internal Representations	53
4.3. Theoretical Representations of Risky Tasks	54
The Probabilistic Representation	54
The Attributive Representation	55
The Deterministic Representation	56
4.4. Studies of Representation Generation	57
Formation of Attributive Representations	57
Formation of Deterministic Representations	60
4.5. The Principles of Representation Generation	62
The Principle of Selection	62
The Principle of Hierarchic Arrangement	63
The Principle of Complexity Reduction	65
4.6. Representation of the Decision Task in the System of Representations	66
4.7. Conclusion	67
CHAPTER FIVE: VALUATION OF CONSEQUENCES. THEORIES OF UTILITY	70
5.1. Utility and Goals	70
5.2. N-M Utility Theory	72
Implications of the Utility Axioms	76
Psychological Validity of Utility Theory	77
5.3. Methods of Utility Measurement	79
Indirect (Behavioural) Methods	79
Direct Methods. Utility Judgments	85

TABLE OF CONTENTS

XI

5.4.	Empirical Utility Function for Money	87
	A Historical Note	88
	Utility Function for Gains	88
	Utility Function for Losses	91
	A Critical Note	92
5.5.	Formal Strategies of Multi-Attribute Utility Assessment	93
	Multi-Attribute Utility Theory: the Decomposition Paradigm	94
	MAUT and Psychological Investigations	96
	The Linear (Compensatory) Strategy	96
	The Conjunctive Strategy	97
	The Disjunctive Strategy	99
	Configurative Strategies	101
5.6.	Empirical Studies of Multi-Attribute Utility Assessment	102
	Measurement Methods	102
	Predominance of the Linear Strategy	103
	Searching for Configurative Strategies	104
	An Interpretation	105
5.7.	A Fresh Look at Preference Intransitivity	107
5.8.	Time Preference. The Discount Function	110
5.9.	Effect of Context on Utility	112
5.10.	Conclusion	113
CHAPTER SIX: PREDICTION. SUBJECTIVE PROBABILITY		115
6.1.	The Concept of Subjective Probability	115
6.2.	Axiomatic Probability Theory	116
	The Probability Axioms	116
	The Implications	117
	Interpretations of Probability	118
	Alexis Ivanovich's Fallacy	120
6.3.	Measurement of Subjective Probability	121
	Indirect Methods	121
	Direct Methods	122
6.4.	The Heuristics of Subjective Probability Assessment	124
	The Representativeness Heuristics	124
	The Availability Heuristic	129
	An Interpretation	132
6.5.	Analysis of a Polish Number Game	133
	The <i>Liczyrzepka</i>	134
	Psychological Analysis of Gambling Behaviour	134
6.6.	Subjective Probability under Total Uncertainty	137
6.7.	Subjective Probability in Chance and Skill Tasks	141
6.8.	Subjective Probability and Utility	144

6.9.	"I Knew It Would Happen"	145
	Studies of Hindsight	146
	An Interpretation	148
6.10.	Cultural Differences in Assessing Probabilities	149
6.11.	Conclusion	150
CHAPTER SEVEN: ALGORITHMIC STRATEGIES OF RISKY CHOICE. THEORIES OF RISK		153
7.1.	The Family of Choice Strategies	153
	Sources of Choice Strategies	153
	Types of Strategy	155
7.2.	The SEU Maximization Strategy	155
	Description of the Strategy	155
	Is SEU Strategy Used by People?	157
7.3.	Probability Preference and Variance Preference	160
	Probability Preference	161
	Variance Preference	161
7.4.	The Strategy of Combining Expected Value and Risk	163
	The Risk Factor in Choice Behaviour	164
	The Portfolio Theory of Risk Preference	165
	Portfolio Theory and Empirical Data	167
	Evaluation of Portfolio Theory	170
7.5.	The Strategy of Combining Payoff and Risk Level	171
	Perceived Risk	172
	Decision as Function of Amount to Win and Perceived Risk	174
	Evaluation of Kietliński's Study	175
7.6.	Theory of Additive Risk	176
	The Axioms of the Theory	176
	Empirical Verification of the Theory	181
7.7.	Theory of Expected Risk	182
	Empirical Verification of the Theory	184
7.8.	An Overview of Risk Theories	185
7.9.	Hesitation and Variability of Decisions	186
	Predecisional Hesitation	186
	Variability of Decisions	188
7.10.	Prediction and Explanation of Choice Processes. Paramorphism	189
	The Phenomenon of Paramorphism	190
	In Search of the True Choice Strategy	191
7.11.	Risk in Modern Society	192
	Perceived Risk in the Social Setting	193
	Acceptable Level of Risk	195
7.12.	Conclusion	196

CHAPTER EIGHT: HEURISTIC STRATEGIES OF RISKY CHOICE	198
8.1. Decision Heuristics	198
Rational Heuristics	199
Psychological Research	200
8.2. Methods for Studying Heuristic Strategies	201
Think Aloud	201
Simulation of Decision Processes	203
8.3. Empirical Studies on Internal and External Strategies	204
Two Types of Strategy	204
Preference for Houses	206
Choice between Gambles	209
8.4. Algorithmic or Heuristic Strategies?	210
8.5. Conclusion	212
CHAPTER NINE: DYNAMIC RISKY TASKS	213
9.1. Decision and Information	213
Sources of Information	214
The Value of Information	215
9.2. The Bayesian Model of the Diagnostic Process	216
9.3. The Steinhaus Study on the Establishment of Paternity	219
The Blood Test	220
An Application of Bayes' Theorem	220
9.4. Empirical Studies of Diagnostic Processes	222
Cognitive Conservatism	222
Sources of Cognitive Conservatism	225
9.5. Are People Intuitive Bayesians?	227
9.6. Heuristic Processes in Diagnosing	230
9.7. The Role of Feedback	233
9.8. Multistage Decisions	235
9.9. Cognitive Biases	238
Gain of Information	239
Instances of Cognitive Bias	240
9.10. Conclusion	242
CHAPTER TEN: OPEN DECISION TASKS. DEEP UNCERTAINTY	244
10.1. Open and Closed Decision Tasks	244
10.2. The Nature of Open Tasks	245
Superficial and Deep Uncertainty	246
Tackling Open Tasks	246

10.3.	Aspiration Level. Multidimensional α^*	247
	The Concept of α^* Aspiration Level	247
	Unidimensional and Multidimensional Aspirations	249
	Psychological Studies of α^* Aspiration Level	249
10.4.	From Aspiration to Decision. Satisficing Theory	250
	Satisficing Theory	251
	Optimal and Good Decisions	252
10.5.	The Descriptive Value of Satisficing Theory	253
	Unidimensional Aspiration Level in the Bargaining Problem	253
	Multidimensional Aspiration Level in Bank Operations	256
10.6.	Generation of Alternatives and Anticipation of Their Consequences	259
	Generation of the Set of Hypotheses	260
	Implications of Hypothesis Set Reduction	264
10.7.	Conclusion	265
CHAPTER ELEVEN: ENVIRONMENT AND RISKY DECISIONS		267
11.1.	The Determinants of Decision Making	267
11.2.	Environmental Constraints in Risky Tasks	269
11.3.	Loss of Freedom: Reactance Theory	270
	The Propositions of Reactance Theory	271
	Research on the Reactance Effect	272
	Addition of New Alternative	274
11.4.	Reversal of Preferences	275
11.5.	Determinants of Cognitive Risk	278
	Type of Problem and Risk Preferences	278
	Cognitive Risk in Research Work	279
11.6.	Decision Making under Stress	281
	Sources of Stress in Decision Making	281
	Changes in Behaviour under Stress	282
11.7.	Conclusion	284
CHAPTER TWELVE: PERSONALITY AND RISKY DECISIONS		286
12.1.	Environment or Personality?	286
	Personality as a Regulatory System	286
	Reykowski's Hypothesis	288
12.2.	Is There a Risk-Taking Tendency?	289
12.3.	Achievement Motivation and Risky Decisions	291
	The Basic Concepts of the Theory of Achievement Motivation	291
	Empirical Research	295
12.4.	Personality Traits in the Choice between Alternatives	296
12.5.	Personality Traits in the Generation of Alternatives and Their Consequences	298

12.6.	Temperament and Gambling Behaviour	299
12.7.	Internal versus External Decision Makers	300
	Belief about Locus of Control	301
	Behaviour of Internals and Externals	303
	An Evaluation	305
12.8.	Conclusion	306
CHAPTER THIRTEEN: GROUP DECISION MAKING		307
13.1.	Individual versus Group Decisions	307
	Small Groups	308
	Group Decisions	308
13.2.	Rational Group Decisions	309
	From Individual to Group Preference	310
	Some Obstacles and Paradoxes	316
13.3.	Risky Shift in Group Decisions	319
13.4.	Why Are Group Decisions More Risky?	321
	Diffusion of Responsibility	321
	The Role of Leaders	322
	The Role of Intra-Group Comparisons	322
	The Artifact Hypothesis	323
	A Compromise	323
13.5.	Research on the Quality of Group Decisions	324
	Testing the Quality of Group Decisions	324
	Group Probability Assessment	326
	Group Biases, Groupthink	328
13.6.	Conclusion	330
CHAPTER FOURTEEN: APPLICATION OF PSYCHOLOGICAL DECISION THEORY		332
14.1.	Cold Knowledge and Warm Knowledge	332
14.2.	Designs for Diagnostic Systems	334
	PIP: A Probabilistic Information Processing System	335
	A General Diagnostic System (GDS)	337
	SS: The Substitutional System	338
14.3.	Rationalization of Personnel Decisions	340
	Personnel Decisions as Risky Tasks	341
	Two Types of Selection Procedure	343
	Estimation of Utilities	343
	The Optimal Procedure	347
	An Evaluation	347

14.4.	Decision Making in Psychotherapy	348
	Psychotherapy as a Decision Sequence	349
	The Initial Interview	351
	Improving the Patient's Decision Making	353
14.5.	Decision Theory in Research Work	355
	The Investigatory Process	356
	The Epistemic Problem as a Decision Sequence	357
	Scientists' Biases	358
14.6.	Analysis of Socio-Economic Decisions	359
	Psychological Expertise	360
	Heuristic Decision Aids: ELMA	362
14.7.	The Making of the Ideal Decision Maker	367
14.8.	Conclusion	368
CHAPTER FIFTEEN: A FINAL SURVEY		370
15.1.	Recapitulation	370
15.2.	Decision Theory and the Model of Man	373
	The System of Values	373
	Generative Rules	374
	The Determinants of Behaviour	375
15.3.	Development Prospects	376
BIBLIOGRAPHY		377
