CONTENTS

PREFACE xv

PART 1

Conceptual Frameworks for Analyzing Technology and Behavior

Chapter 1
Adriaan Slob and Peter-Paul Verbeek
TECHNOLOGY AND USER BEHAVIOR:
An Introduction 3
1. The intriguing interactions between technology and behavior 3
2. The need for an integrated approach 5
3. Theoretical perspectives 8
4. Research questions and outline of the book 11
References 12

Chapter 2
Albert G. Arnold and Petra Mettau
ACTION FACILITATION AND DESIRED BEHAVIOR 13
1. Introduction 13
2. Model of technology-human interaction 14
3. The concepts of 'action facilitation' and 'affordance of an artifact' 15
4. Action theory 16
5. Optimization of action efficiency 19
References 20

Chapter 3
Adrienne van den Bogaard and Paul Swuste
SAFETY:
Technology and Behavior? 21
1. Introduction 21
2. A short characterization of Safety Science 22
3. Four causal safety factors 24
4. Interaction between technology and behavior 28
5. Conclusions 30
References 31

Chapter 4
J.P. Groot-Marcus, P.M.J. Terpstra, L.P.A. Steenbekkers
and C.A.A. Butijn
TECHNOLOGY AND HOUSEHOLD ACTIVITIES 33
1. Introduction 33
2. Developments in Household Sciences 34
3. Consumer-Technology Interaction Model 35
4. Technological influences and responses 37
5. Discussion and recommendations 39
References 41

Chapter 5
Wim J.M. Heijs
TECHNOLOGY AND BE HAVIOR:
Contributions from Environmental Psychology 43
1. Introduction 43
2. Information processing 44
3. Capita selecta 48
4. Conclusion 51
References 52

Chapter 6
Peter-Paul Verbeek
ACTING ARTIFACTS:
The Technological Mediation of Action 53
1. Introduction 53
2. Technology and human-world relationships 53
3. Mediation of perception 56
4. Mediation of action 57
5. Conclusion: a vocabulary for technological mediation 60
References 60

Chapter 7
Jaap Jelsma
TECHNOLOGY AND BE HAVIOR:
A View from STS 61
1. Introduction 61
2. Science studies: social construction of facts 62
3. Technology studies: social construction of technology 63
4. From social construction of technology to configuration of users 64
5. Last step: total symmetry between humans and things 65
6. What have we gained? 67
References 69

Chapter 8
Philip Brey
THE SOCIAL AGENCY OF TECHNOLOGICAL ARTIFACTS:
A Typology 71
1. Introduction 71
2. Behavioral affordances and constraints 73
3. User-profile affordances and constraints 74
4. Material and infrastructural affordances and constraints 74
5. Social affordances and constraints 75
6. Cultural affordances and constraints 78
7. Conclusion 79
References 79

Chapter 9
Wim J.M. Heijs and Peter-Paul Verbeek
TECHNOLOGY AND USERS:
A Conceptual Map 81
1. Introduction 81
2. A conceptual map 82
3. Districts, landmarks and edges 85
4. Nodes and paths 87
5. Conclusions 91
Reference 92

PART 2

Technology, Behavior and Sociotechnical Practices

Chapter 10
Laurie Hendrickx and Anton J.M. Schoot Uiterkamp
TECHNOLOGY AND BE HAVIOR:
The Case of Passenger Transport 95
1. Introduction 95

2. Conceptual model 96
3. Car type choice 98
4. Transport mode choice 100
5. Driving style 101
6. Conclusions 102
7. A research agenda 103
References 104

Chapter 11
Gert Spaargaren, Susan Martens and Theo A.M. Beckers
SUSTAINABLE TECHNOLOGIES AND EVERYDAY LIFE 107
1. Introduction 107
2. The Social Practices Approach 108
3. Putting the concepts to work: two case studies 112
4. Discussion 116
References 117

Chapter 12
Erica Derijcke and Jan Uitzinger
RESIDENTIAL BEHAVIOR IN SUSTAINABLE HOUSES 119
1. Introduction 119
2. Case study 1 120
3. Case study 2 122
4. General discussion and conclusions 124
References 126

Chapter 13
L.T. McCalley and Cees J.H. Midden
MAKING ENERGY FEEDBACK WORK:
Goal-Setting and the Roles of Attention and Minimal Justification 127
1. Introduction 127
2. Feedback Intervention Theory 129
3. Minimal Justification 129
4. Method 131
5. Results 133
6. Conclusions 134
References 135

Chapter 14
Trijntje Völlink and Ree M. Meertens
TECHNOLOGICAL INNOVATIONS AND THE PROMOTION
OF ENERGY CONSERVATI ON:
The Case of Goal-Setting and Feedback 139
1. Introduction 139
2. Study 1: electronic feedback through information pages to
reduce energy and water consumption 140

3. Study 2: the effect of a prepayment meter on residential gas consumption 143
4. Discussion and conclusion 146
References 147

Chapter 15
Wim J.M. Heijs
HOUSEHOLD ENERGY CONSUMPTION:
Habitual Behavior and Technology 149
1. Introduction 149
2. Theoretical framework 150
3. Intervention and prevention 153
4. The role of technology 155
References 156

Chapter 16
Nicole van Kesteren and Ree M. Meertens
MARKETING OF TECHNOLOGICAL PRODUCTS:
Theory and Methods 159
1. Introduction 159
2. Advertising tactics 160
3. The FCB model of Vaughn 161
4. The Rossister and Percy grid 163
5. Brief history of advertising research: contribution and criticism 164
6. Means-end chain theory and laddering 166
7. Brief history of laddering research: contribution and criticism 168
8. Discussion 169
References 170

Chapter 17
Trijntje Völlink, Ree M. Meertens and Cees J.H. Midden
DIFFUSION OF TECHNO LOGICAL INNOVATIONS:
Promoting the Large-Scale Use of Technology 173
1. Introduction 173
2. Methods 175
3. Results 178
4. Discussion and Conclusions 179
References 180

Chapter 18
Nicole van Kesteren, Ree M. Meertens and Mirjam Fransen
TECHNOLOGICAL INNOVATIONS AND ENERGY CONSERVATION:
Satisfaction With and Effectiveness of an In-Business Control System 181
1. Introduction 181

2. Methodology 184
3. Results 185
4. Summary of results and discussion 187
References 188

Chapter 19
Cees J.H. Midden
SUSTAINABLE TECHNOLOGY OR SUSTAINABLE USERS? 191
1. Introduction 191
2. Who is in charge? 192
3. The user as moderator of technological effects 194
4. User impacts through the sociotechnical environment 194
5. Persuading the user through technology mediated feedback 196
6. The 'automated' user of technology 197
7. Adopting technological products 198
8. Conclusion 199
References 200

PART 3

Designing Technology-Behavior Interactions

Chapter 20
Wybo Houkes and Pieter E. Vermaas
PLANNING BEHAVIOR:
Technical Design as Design of Use Plans 203
1. Introduction 203
2. Designing using by plans 204
3. Designing use plans 205
4. Communicating plans 207
5. Planning behavior 208
References 209

Chapter 21
Harro van Lente
EXPECTED BEHAVIOR:
Anticipation of Use in Technological Development 211
1. Introduction 211
2. Two types of anticipations 212
3. The force of radical anticipations 213
4. Obsolete technology 214
5. The logic of progress 215
6. Anticipations and positions 216
7. Conclusion: anticipations are not innocent 218
References 218

Chapter 22
Jaap Jelsma
DESIGNING 'MORALIZED' PRODUCTS:
Theory and Practice 221
1. Introduction 221
2. Conceptual framework: script language 223
3. Design methodology in eight steps 226
4. Pilot study: redesigning the dishwasher 229
5. Lessons 230
References 230

Chapter 23
G.W. Wolters and L.P.A. Steenbekkers
THE SCENARIO METHOD TO GAIN INSIGHT INTO USER ACTIONS 233
1. Introduction 233
2. Literature 234
3. The scenario method 236
4. The application of the method in the design process 238
References 240

Chapter 24
Remke Klapwijk, Marjolijn Knot, Jaco Quist and Philip J. Vergragt
USING DESIGN ORIENTING SCENARIOS TO ANALYZE THE INTERACTION BETWEEN TECHNOLOGY, BEHAVIOR AND ENVIRONMENT IN THE SUSHOUSE PROJECT 241
1. Introduction 241
2. Design Orienting Scenarios in the SusHouse project 242
3. Studying interactions between technology, behavior and environment 245
4. A classification of interactions applied to clothing care scenarios 246
5. Conclusions 249
References 251

Chapter 25
Valerie Frissen and Marc van Lieshout
ICT IN EVERYDAY LIFE:
The Role of the User 253
1. Introduction 253
2. Background: a 'mutual shaping' perspective 254
3. The domestication of ICT in everyday life 255
4. Configuring users 256
5. The appropriation of ICT 257
6. The design-domestication interface and the usefulness of experimentation 260
References 261

Chapter 26
Marjolijn Knot and Helma Luiten
USER INVOLVEMENT IN THE DEVELOPMENT
OF SUSTAINABLE PRODUCT-SERVICE SYSTEMS:
The Case of the Personal Mobility System 'Mitka' 263
1. Sustainable product-service systems: technology and behavior 263
2. The Mitka project 265
3. Conclusions and discussion 273
References 275

Chapter 27
Henk Muis
ETERNALLY YOURS:
Some Theory and Practice on Cultural Sustainable Product
Development 277
1. Introduction 277
2. Product life extension 278
3. Psychological life span 283
4. Practices 290
References 292

Chapter 28
Han Brezet
DESIGNING TECHNOLOGY-BEHAVIOR INTERACTIONS 295
1. Introduction 295
2. The need for a broader scope and approach 297
3. Consequences for industrial designers 302
4. Nine golden rules for responsible TBI design 304
References 305

PART 4

Implications for Policy

Chapter 29
Bas van Vliet
CITIZEN-CONSUMER ROLES IN ENVIRONMENTAL
MANAGEMENT OF LARGE TECHNOLOGICAL SYSTEMS 309
1. Introduction 309
2. Large technical systems and the roles of their users 310
3. Intermezzo: Innovation and differentiation in utility systems 312
4. Environmental innovation and differentiation in the water
sector 314
5. Environmental innovation and differentiation in electricity
provision 315
6. New consumer roles in environmental innovation in water
and electricity systems 317
References 317

Chapter 30
Markus Popkema and Ingrid van Schagen
MODIFYING BEHAVIOR BY SMART DESIGN:
The Example of the Dutch Sustainable-Safe Road System 319
1. Introduction 319
2. Human error in traffic 320
3. A sustainable-safe traffic system: the theory 323
4. Sustainable-safe road design: from theory to practice 325
5. Conclusions 327
References 328

Chapter 31
Boelie Elzen
COMBINING TECHNICAL AND BEHAVIORAL CHANGE:
The Role of Experimental Projects as a Step Stone Towards Sustainable Mobility 331
1. Introduction 331
2. Socio-technical learning in niches 332
3. Brief examples 333
4. Relevance for pathways towards sustainable mobility 335
5. Improving learning in experiments 336
6. Conclusion 338
References 339

Chapter 32
David Laws
THE PRACTICE OF INNOVATION:
Institutions, Policy and Technology Development 341
1. Introduction 341
2. An examplar of new practice 343
3. The landscape and logic of development 346
4. A new logic of practice 348
5. Policy implications 352
References 356

Chapter 33
Philip Brey
ETHICAL ASPECTS OF BEHAVIOR-STEERING TECHNOLOGY 357
1. Introduction 357
2. The freedom issue 358
3. The technocracy versus democracy issue 361
4. The responsibility issue 363
5. Conclusion: dealing with the moral issues in behavior-steering technology 363
References 364

Chapter 34
Sytse Strijbos
A NORMATIVE SYSTEMS APPROACH FOR MANAGING TECHNOLOGY AND COLLECTIVE HUMAN ACTION 365
1. Introduction 365
2. The context of social practices 366
3. Context of socio-technical systems 369
4. Normative types of technology 369
References 373

Chapter 35
Wim Hafkamp
SHAPING TECHNOLOGY-BEHAVIOR INTERACTIONS:
Lessons for Policy Making 375
1. Introduction 375
2. The technology-behavior dilemma in environmental policy making 376
3. The Score in Policy Sciences 377
4. Interactive processes 379
5. Implications for policy 381
References 383

Chapter 36
Peter-Paul Verbeek and Adriaan Slob
ANALYZING THE RELATIONS BETWEEN TECHNOLOGIES AND USER BEHAVIOR:
Towards a Conceptual Framework 385
1. The need for a sociotechnical approach 385
2. A vocabulary to describe relations between technological products and user behavior 386
3. Implications for technology design and policy-making 392
4. Conclusion 398
Reference 399
