

# **Isaac Newton on Mathematical Certainty and Method**

**Niccolò Guicciardini**

**The MIT Press  
Cambridge, Massachusetts  
London, England**

# Contents

Preface xiii

Abbreviations and Conventions xxi

I Preliminaries 1

1 Newton on Mathematical Method 3

- 1.1 Early Influences 3
- 1.2 First Steps 6
- 1.3 Plane Curves 7
- 1.4 Fluxions 10
- 1.5 In the Wake of the *Anni Mirabiles* 11
- 1.6 Maturity 14

2 Newton on Certainty in *Optical Lectures* 19

3 Descartes on Method and Certainty in the *Géométrie* 31

- 3.1 Analysis and Synthesis in Pappus 31
- 3.2 Analysis and Synthesis in Descartes' Mathematical Canon 38
- 3.3 An Example of Analysis and Synthesis of a Determinate Problem 49
- 3.4 An Example of Analysis and Synthesis of an Indeterminate Problem 53
- 3.5 The Limitations of Descartes' Mathematical Canon 56

## II Against Cartesian Analysis and Synthesis 59

### 4 Against Descartes on Determinate Problems 61

- 4.1 *Lucasian Lectures on Algebra* 61
- 4.2 Demarcation and Simplicity in the Construction of Equations 64
- 4.3 Neusis Constructions 68
- 4.4 Conic Constructions 72
- 4.5 Against Cartesian Synthesis 74
- 4.6 Against Cartesian Analysis 76

### 5 Against Descartes on Indeterminate Problems 79

- 5.1 In Search of Ancient Analysis 79
- 5.2 Porisms 81
- 5.3 Newton's Two-Step Approach to the Pappus Problem 89
- 5.4 Organic Description of Conics 93
- 5.5 Tensions 106

### 6 Beyond the Cartesian Canon: The Enumeration of Cubics 109

- 6.1 Studies on Cubics 109
- 6.2 Absence of Demonstrations in the *Enumeratio* 113
- 6.3 Common Analysis in the *Enumeratio* 117
- 6.4 Projective Geometry in the *Enumeratio* 121
- 6.5 New Analysis in the *Enumeratio* 130

## III New Analysis and the Synthetic Method 137

### 7 The Method of Series 139

- 7.1 Wallis's *Arithmetica Infinitorum* 139
- 7.2 Criticism Leveled at Wallis 144
- 7.3 The Binomial Series 148
- 7.4 Infinite Series and Quadratures 154
- 7.5 Resolution of Affected Equations 158
- 7.6 New and Common Analyses 164

**8 The Analytical Method of Fluxions 169**

- 8.1 Barrow 169
- 8.2 Preliminaries to the Method of Fluxions 179
- 8.3 The Direct Method of Fluxions 186
- 8.4 The Inverse Method of Fluxions 193
- 8.5 The Inverse Method in *De Quadratura* 202
- 8.6 *Methodus Differentialis* 210
- 8.7 A Question of Style 211

**9 The Synthetic Method of Fluxions 213**

- 9.1 Synthetic Quadratures in *De Methodis* 213
- 9.2 "Geometria Curvilinea" 217
- 9.3 First and Ultimate Ratios in the *Principia* 219
- 9.4 Lemma 2, Book 2, of the *Principia* 223
- 9.5 Limits in *De Quadratura* 226
- 9.6 A Method Worthy of Public Utterance 230

**IV Natural Philosophy 233****10 The *Principia* 235**

- 10.1 Genesis of the *Principia* 235
- 10.2 An Overview of the *Principia* 238
- 10.3 Did Newton Use the Calculus in the *Principia*? 252

**11 Hidden Common Analysis 259**

- 11.1 Proposition 30, Book 1, of the *Principia* 259
- 11.2 Newton's Synthetic Construction for Proposition 30, Book 1 261
- 11.3 Descartes' Construction of Third-Degree Equations 262
- 11.4 The Analysis behind Proposition 30, Book 1 262
- 11.5 Concluding Remarks 266

**12 Hidden New Analysis 267**

- 12.1 *Concessis curvilinearum figurarum quadraturis* 267
- 12.2 The Inverse Problem of Central Forces 268

12.3 Attraction of Solids of Revolution 279

12.4 Concluding Remarks 288

## V Ancients and Moderns 291

### 13 Geometry and Mechanics 293

13.1 The *Preface* to the *Principia* 293

13.2 Mathematical Manuscripts Related to the *Preface* 299

13.3 Mechanical Curves in the Study of Planetary Motion 305

### 14 Analysis and Synthesis 309

14.1 Analysis and Synthesis in “*Geometriae Libri Duo*” 309

14.2 Realism and Constructivism 313

14.3 Analysis and Synthesis in Natural Philosophy 315

## VI Against Leibniz 329

### 15 The Quarrel with Leibniz: A Brief Overview 331

### 16 Scribal Publication, 1672–1699 339

16.1 Newton's Reluctance to Publish 339

16.2 Manuscript Circulation 346

16.3 Correspondence with Collins and Leibniz 351

16.4 Disclosures, 1684–1699 361

### 17 Fluxions in Print, 1700–1715 365

17.1 In the Public Sphere 365

17.2 *Commercium Epistolicum* 372

17.3 The “Account” 381

## Conclusion 385

**A Brief Chronology of Newton's Mathematical Work 389**

**References 391**

**Index 413**
