

Proof-Theoretical Coherence

Kosta Došen and Zoran Petrić

CONTENTS

Preface	v
CHAPTER 1. Introduction	1
§1.1. Coherence	1
§1.2. Categorification	6
§1.3. The Normalization Conjecture in general proof theory	10
§1.4. The Generality Conjecture	15
§1.5. Maximality	24
§1.6. Union of proofs and zero proofs	26
§1.7. Strictification	29
CHAPTER 2. Syntactical Categories	33
§2.1. Languages	34
§2.2. Syntactical systems	36
§2.3. Equational systems	39
§2.4. Functors and natural transformations	42
§2.5. Definable connectives	44
§2.6. Logical systems	46
§2.7. Logical categories	51
§2.8. C -functors	53
§2.9. The category Rel and coherence	59
CHAPTER 3. Strictification	65
§3.1. Strictification in general	65
§3.2. Direct strictification	78
§3.3. Strictification and diversification	85
CHAPTER 4. Associative Categories	87
§4.1. The logical categories \mathcal{K}	88
§4.2. Coherence of semiassociative categories	89
§4.3. Coherence of associative categories	93
§4.4. Associative normal form	95
§4.5. Strictification of associative categories	98
§4.6. Coherence of monoidal categories	100
§4.7. Strictification of monoidal categories	102

CHAPTER 5. Symmetric Associative Categories	107
§5.1. Coherence of symmetric associative categories	107
§5.2. The faithfulness of GH	110
§5.3. Coherence of symmetric monoidal categories	112
CHAPTER 6. Biassociative Categories	115
§6.1. Coherence of biassociative and bimonoidal categories	115
§6.2. Form sequences	117
§6.3. Coherence of symmetric biassociative categories	117
§6.4. Coherence of symmetric bimonoidal categories	119
§6.5. The category \mathbf{S}'	121
CHAPTER 7. Dissociative Categories	127
§7.1. Coherence of dissociative categories	128
§7.2. Net categories	131
§7.3. Coherence of net categories	133
§7.4. Net normal form	142
§7.5. Coherence of semidissociative biassociative categories	143
§7.6. Symmetric net categories	145
§7.7. Cut elimination in \mathbf{GDS}	148
§7.8. Invertibility in \mathbf{GDS}	155
§7.9. Linearly distributive categories	163
CHAPTER 8. Mix Categories	165
§8.1. Coherence of mix and mix-dissociative categories	165
§8.2. Coherence of mix-biassociative categories	167
§8.3. Coherence of mix-net categories	171
§8.4. Coherence of mix-symmetric net categories	174
§8.5. Coherence of mix-symmetric biassociative categories	180
CHAPTER 9. Lattice Categories	181
§9.1. Coherence of semilattice categories	181
§9.2. Coherence of cartesian categories	187
§9.3. Maximality of semilattice and cartesian categories	190
§9.4. Coherence of lattice categories	195
§9.5. Maximality of lattice categories	201
§9.6. Coherence of dicartesian and sesquicartesian categories	203
§9.7. Relative maximality of dicartesian categories	207

CHAPTER 10. Mix-Lattice Categories	213
§10.1. Mix-lattice categories and an example	213
§10.2. Restricted coherence of mix-lattice categories	216
§10.3. Restricted coherence of mix-dicartesian categories	221
CHAPTER 11. Distributive Lattice Categories	225
§11.1. Distributive lattice categories and their Gentzenization	226
§11.2. Cut elimination in \mathcal{D}	240
§11.3. Coherence of distributive lattice categories	257
§11.4. Legitimate relations	262
§11.5. Coherence of distributive dicartesian categories	264
CHAPTER 12. Zero-Lattice Categories	269
§12.1. Zero-lattice and zero-dicartesian categories	270
§12.2. Coherence of zero-lattice and zero-dicartesian categories	276
§12.3. Maximality of zero-lattice and zero-dicartesian categories	278
§12.4. Zero-lattice and symmetric net categories	279
§12.5. Zero-identity arrows	281
CHAPTER 13. Zero-Mix Lattice Categories	289
§13.1. Coherence of zero-mix lattice categories	289
§13.2. Zero-mix lattice and distributive lattice categories	295
§13.3. Coherence of zero-mix dicartesian categories	298
§13.4. The category <i>Semilat*</i>	299
CHAPTER 14. Categories with Negation	303
§14.1. De Morgan coherence	304
§14.2. Boolean coherence	310
§14.3. Boolean categories	316
§14.4. Concluding remarks	322
Problems Left Open	326
List of Equations	327
List of Categories	340
Charts	349
Bibliography	353
Index	359
