

Paul Needham

Macroscopic Metaphysics

Middle-Sized Objects and Longish Processes

Contents

1 Mereology	1
1.1 Continuants and Occurrents	1
1.2 Mereology	5
1.3 Times	11
1.3.1 Directed Time	15
1.4 Regions of Space	18
1.4.1 Completeness of the Theory of Regions	21
1.5 Taking Stock	23
2 Occupying Space	29
2.1 Boundaries	29
2.2 Doing Without Boundaries	31
2.3 Keeping in Touch	32
2.4 Abutment Without Material Abutment	35
2.5 Mathematical Analysis and Indispensability	38
2.6 Occupying a Region Exactly	44
3 Constitution	47
3.1 Distinguishing Constitution and Parthood	47
3.2 Individuals	51
3.3 Occupation for Individuals	56
3.4 Component Parts	59
3.5 Operations on Component Parts?	61
3.6 Modality	66
3.7 Appendix: Van Inwagen's Understanding of Parthood as Time-Dependent	71
4 Distributivity and Cumulativity	75
4.1 Mass Predicates	75
4.2 The Distributive and Cumulative Conditions	77
4.3 Relational Predicates	78

4.4	Generalising the Cumulative Condition.....	81
4.5	Spatial Parts	83
4.6	Is Cooccupancy Really Possible?	86
5	The Ancients' Ideas of Substance	89
5.1	Doing Without Atoms	89
5.2	Aristotle's Conception of Substances as Homogeneous	91
5.3	Two Kinds of Mixing Process	93
5.4	Simplicity, Actuality and Potentiality	96
5.5	The Stoic Alternative to Potential Presence	99
5.6	Formalisation	101
5.7	Potential Parts and Potential Qualities	106
6	The Nature of Matter	113
6.1	The Scope of Metaphysics in the Enlightenment.....	113
6.2	Phase-Bound Substances	115
6.3	Distinguishing Substance and Phase	118
6.4	Thermodynamics and the Phase Rule.....	120
7	The Relation of Macroscopic Description to Microstructure	127
7.1	Water is H ₂ O	127
7.2	What Do Substance Predicates Apply To?.....	129
7.3	What Do Phase Predicates Apply To?	138
7.4	Indiscernible Particles	142
	7.4.1 Discussion.....	149
8	Longish Processes	151
8.1	Occurrents	151
8.2	Change.....	153
8.3	Distinguishing Processes from States	158
8.4	Causings	164
8.5	Relating Processes to Quantities, Regions and Times.....	166
8.6	The Mereological Structure of Processes	169
8.7	The Relational Character of Processes	172
8.8	Modality	176
9	Modal Properties of Quantities	179
9.1	Introduction	179
9.2	Elements and Compounds	180
9.3	Water is H ₂ O Again	185
9.4	Possible States.....	188
9.5	Possible Processes	190
	Appendix Summary of Some Main Principles	201
	Mereological Axioms for Quantities	201
	Abutment	202

Occupancy	202
Static Abutment	203
Abutment on the Move	203
Constitution	204
Lavoisier’s Principle of the Indestructibility of Matter	205
Distributivity and Cumulativity	206
Processes	207
Modal Properties of Quantities	208
Glossary	209
Bibliography	211
Index	219
