 - Five Focal Virtues 37
 - Moral Ideals 44
 - Moral Excellence 48
 - Conclusion 55
3. Moral Status 62
 - The Problem of Moral Status 62
 - Theories of Moral Status 64
 - From Theories to Practical Guidelines 79
 - The Moral Significance of Moral Status 89
 - Vulnerable Populations and Vulnerable Individuals 90
 - Conclusion 94

PART II MORAL PRINCIPLES

4. **Respect for Autonomy** 101
 The Concept of Autonomy and the Principle of Respect for Autonomy 101
 The Capacity for Autonomous Choice 114
 The Meaning and Justification of Informed Consent 120
 Disclosure 125
 Understanding 131
 Voluntariness 137
 Conclusion 140
5. **Nonmaleficence** 150
 The Concept of Nonmaleficence and the Principle of Nonmaleficence 151
 Distinctions and Rules Governing Nontreatment 158
 Optional Treatments and Obligatory Treatments 168
 Killing and Letting Die 174
 The Justification of Intentionally Arranged Deaths 178
 Problems of Group Harm 186
 Protecting Incompetent Patients 188
 Conclusion 192
6. **Beneficence** 202
 The Concept of Beneficence and Principles of Beneficence 202
 Obligatory Beneficence and Ideal Beneficence 203
 Paternalism: Conflicts between Beneficence and Respect for Autonomy 214
 Surrogate Decision Making for Incompetent Patients 226
 Balancing Benefits, Costs, and Risks 229
 The Value and Quality of Life 237
 Conclusion 241

7. Justice 249
- The Concept of Justice and Principles of Justice 250
 - Traditional Theories of Justice 253
 - Recent Theories of Justice 258
 - Fair Opportunity and Unfair Discrimination 262
 - Vulnerability, Exploitation, and Discrimination in Research 267
 - National Health Policy and the Right to Health Care 270
 - Global Health Policy and the Right to Health 276
 - Allocating, Setting Priorities, and Rationing 279
 - Conclusion 292
8. Professional–Patient Relationships 302
- Veracity 302
 - Privacy 311
 - Confidentiality 316
 - Fidelity 324
 - Clinical Ethics and Research Ethics 331
 - The Dual Roles of Clinician and Investigator 333
 - Conclusion 340

PART III THEORY AND METHOD 351

9. Moral Theories 351
- Criteria for Assessing Moral Theories 352
 - Utilitarian Theory 354
 - Kantian Theory 361
 - Rights Theory 367
 - Virtue Theory 375
 - Convergence of Theories 383
 - Conclusion 384

10. Method and Moral	
Justification	390
Justification in Ethics	390
Top-Down Models: Theory and Application	391
Bottom-Up Models: Cases and Analogical	
Reasoning	397
Reflective Equilibrium as an Integrated Model	404
Common-Morality Theory	410
Conclusion	423

Index	431
