

Twenty-five Years of Constructive Type Theory

Proceedings of a Congress Held in
Venice, October 1995

Edited by

GIOVANNI SAMBIN

University of Padua, Italy

and

JAN M. SMITH

*Chalmers University of Technology,
Göteborg, Sweden*

CLARENDON PRESS • OXFORD

1998

Contents

1.	Yet another constructivization of classical logic <i>Stefano Baratella and Stefano Berardi</i>	1
2.	Extension of Martin-Löf's type theory with record types and subtyping <i>Gustavo Betarte and Alvaro Tasistro</i>	21
3.	Type-theoretical checking and philosophy of mathematics <i>Nicolaas Govert de Bruijn</i>	41
4.	The Hahn–Banach theorem in type theory <i>Jan Cederquist, Thierry Coquand and Sara Negri</i>	57
5.	A realizability interpretation of Martin-Löf's type theory <i>Catarina Coquand</i>	73
6.	The groupoid interpretation of type theory <i>Martin Hofmann and Thomas Streicher</i>	83
7.	Analytic program derivation in type theory <i>Petri Mäenpää</i>	113
8.	An intuitionistic theory of types <i>Per Martin-Löf</i>	127
9.	On storage operators <i>Karim Nour</i>	173
10.	On universes in type theory <i>Erik Palmgren</i>	191
11.	How to believe a machine-checked proof <i>Robert Pollack</i>	205
12.	Building up a toolbox for Martin-Löf's type theory: subset theory <i>Giovanni Sambin and Silvio Valentini</i>	221
13.	An introduction to well-ordering proofs in Martin-Löf's type theory <i>Anton Setzer</i>	245
14.	Variable-free formalization of the Curry–Howard theory <i>William W. Tait</i>	265
15.	The forget–restore principle: a paradigmatic example <i>Silvio Valentini</i>	275
