# **Extensional Constructs in Intensional Type Theory**

Springer

# Table of Contents

<b>Preface</b> .....	<b>V</b>
<b>1. Introduction</b> .....	<b>1</b>
1.1 Definitional and propositional equality .....	1
1.2 Extensional constructs .....	4
1.3 Method .....	5
1.3.1 The use of categorical models .....	6
1.3.2 Syntactic models .....	6
1.4 Applications .....	8
1.4.1 Application to machine-assisted theorem proving .....	8
1.5 Overview .....	9
<b>2. Syntax and semantics of dependent types</b> .....	<b>13</b>
2.1 Syntax for a core calculus .....	13
2.1.1 Raw syntax .....	14
2.1.2 Judgements .....	14
2.1.3 Notation .....	17
2.1.4 Derived rules and meta-theoretic properties .....	18
2.2 High-level syntax .....	19
2.2.1 Telescopes .....	19
2.2.2 Elements of telescopes and context morphisms .....	19
2.2.3 Definitions and substitution .....	20
2.3 Further type formers .....	21
2.3.1 Unit type .....	21
2.3.2 $\Sigma$ -types .....	22
2.3.3 Function and cartesian product types .....	22
2.3.4 The Calculus of Constructions .....	22
2.3.5 Universes .....	23
2.3.6 Quotient types .....	24
2.4 Abstract semantics of type theory .....	24
2.4.1 Syntactic categories with attributes .....	25
2.4.2 Type constructors .....	34
2.5 Interpreting the syntax .....	45
2.5.1 Partial interpretation .....	45
2.5.2 Soundness of the interpretation .....	46

2.6	Discussion and related work	53
<b>3.</b>	<b>Syntactic properties of propositional equality</b>	<b>55</b>
3.1	Intensional type theory	55
3.1.1	Substitution	55
3.1.2	Uniqueness of identity	57
3.1.3	Functional extensionality	59
3.2	Extensional type theory	61
3.2.1	Comparison with Troelstra's presentation	62
3.2.2	Undecidability of extensional type theory	62
3.2.3	Interpreting extensional type theory in intensional type theory	64
3.2.4	An extension of $\text{TT}_I$ for which the interpretation in $\text{TT}_E$ is surjective	66
3.2.5	Conservativity of $\text{TT}_E$ over $\text{TT}_I$	68
3.2.6	Discussion and extensions	77
3.2.7	Conservativity of quotient types and functional extensionality	84
3.3	Related work	86
<b>4.</b>	<b>Proof irrelevance and subset types</b>	<b>89</b>
4.1	The refinement approach	89
4.2	The deliverables approach	91
4.3	The deliverables model	92
4.3.1	Contexts	92
4.3.2	Families of specifications	93
4.3.3	Sections of specifications (deliverables)	94
4.4	Model checking with Lego	94
4.4.1	Records in Lego	95
4.4.2	Deliverables in Lego	95
4.5	Type formers in the model $\mathbf{D}$	97
4.5.1	Dependent products	97
4.5.2	Dependent sums	98
4.5.3	Natural numbers	100
4.5.4	The type of propositions	100
4.5.5	Proof irrelevance	103
4.5.6	Universes	104
4.6	Subset types	105
4.6.1	Subset types without impredicativity	106
4.6.2	A non-standard rule for subset types	106
4.7	Reinterpretation of the equality judgement	111
4.8	Related work	112

<b>5. Extensionality and quotient types</b> .....	115
5.1 The setoid model .....	115
5.1.1 Contexts of setoids .....	116
5.1.2 Implementing the setoid model $\mathbf{S}_0$ in Lego .....	119
5.1.3 Type formers in the setoid model .....	119
5.1.4 Propositions .....	120
5.1.5 Quotient types .....	125
5.1.6 Interpretation of quotient types in $\mathbf{S}_0$ .....	126
5.1.7 A choice operator for quotient types .....	129
5.1.8 Type dependency and universes .....	132
5.2 The groupoid model .....	135
5.2.1 Groupoids .....	136
5.2.2 Interpretation of type formers .....	142
5.2.3 Uniqueness of identity .....	146
5.2.4 Propositional equality as isomorphism .....	147
5.3 A dependent setoid model .....	148
5.3.1 Families of setoids .....	150
5.3.2 Dependent product .....	153
5.3.3 The identity type .....	154
5.3.4 Inductive types .....	156
5.3.5 Quotient types .....	158
5.4 Discussion and related work .....	160
<b>6. Applications</b> .....	163
6.1 Tarski's fixpoint theorem .....	164
6.1.1 Discussion .....	167
6.2 Streams in type theory .....	167
6.3 Category theory in type theory .....	171
6.3.1 Categories in $\mathbf{S}_0$ .....	172
6.3.2 Categories in $\mathbf{S}_1$ .....	174
6.3.3 Discussion .....	175
6.4 Encoding of the coproduct type .....	176
6.4.1 Development in the setoid models .....	177
6.5 Some basic constructions with quotient types .....	178
6.5.1 Canonical factorisation of a function .....	178
6.5.2 Some categorical properties of $\mathbf{S}_0$ .....	180
6.5.3 Subsets and quotients .....	180
6.5.4 Saturated subsets .....	181
6.5.5 Iterated quotients .....	182
6.5.6 Quotients and products .....	182
6.5.7 Quotients and function spaces .....	183
6.6 $\Sigma$ is co-continuous—intensionally .....	184
6.6.1 Parametrised limits of $\omega$ -chains .....	184
6.6.2 Development in $\mathbf{TT}_E$ .....	186
6.6.3 Development in $\mathbf{TT}_I$ .....	186

<b>7. Conclusions and further work</b> .....	189
<b>Appendix A. Lego context approximating <math>S_0</math></b> .....	191
A.1 Extensionality axioms .....	191
A.2 Quotient types .....	191
A.3 Further axioms .....	192
<b>Appendix B. Syntax</b> .....	193
<b>Appendix C. A glossary of type theories</b> .....	201
<b>Appendix D. Index of symbols</b> .....	203
<b>Index</b> .....	212
