Preface	9
Part One	
From the classical to the marginal theory of value and distribution	
1. The classical theory of value and distribution (1770-1870)	13
1. Smith's theory of value and distribution	14
2. Ricardo's theory of distribution and value	23
3. J.S. Mill's value theory	35
2. The marginal revolution (1871-1874)	39
1. Menger's theory of value and distribution	40
2. Jevons's value theory	49
3. Walras's general equilibrium theory	55
Part Two	
Marginal analysis from consolidation to the ordinal revolution	
3. Consolidation of marginalism (1875-1900)	63
1. Edgeworth's theories of utility and exchange	64
2. Wicksteed's marginal productivity theory and the exhaustion problem	69
3. Marshall's partial equilibrium theory, with an aside on Cournot	73
4. Summing up	84

4. The ordinal revolution and its discontents (1890-1945)	85
1. Fisher's utility theory	86
2. Pareto's superseding of measurable utility	88
3. Hicks and Allen's behaviorist demand analysis	96
4. Slutsky's forgotten paper	100
5. The establishment of the ordinal-utility approach	101
6. Discontents in England: Robertson and Bernardelli	103
7. Samuelson's revealed preference approach	104
8. Discontents at Chicago: Schultz and Friedman	107

Part Three

From early monetary and business cycle theories to modern macroeconomics

5. Monetary and business cycle theories (1750-1935)	115
1. The quantity theory of money	116
2. Theories of the nature and origin of money	120
3. Wicksell's business cycle theory	127
4. Hayek's business cycle theory	132
6. Keynes: from the «classical» theory to the <i>General theory</i> (1920-1936)	139
1. The <i>Tract on monetary reform</i>	140
2. The <i>Treatise on money</i>	143
3. From the <i>Treatise</i> to the <i>General theory</i>	145
4. The <i>General theory</i>	147
7. IS-LM macroeconomics and the neoclassical synthesis (1937-1965)	159
1. Hicks's IS-LM model	161
2. Modigliani's analysis of the labor market	165
3. Samuelson's Keynesian cross	169
4. IS-LM macroeconomics	170
5. The neoclassical synthesis	171
8. The rise of monetarism and new classical macroeconomics (1965-1980)	173
1. Friedman's monetarism	175
2. Lucas's new classical macroeconomics	184

Part Four

**History of recent microeconomics:
from game theory to behavioral economics**

9. Birth and early developments of game theory (1920-1970)	195
1. Von Neumann and Morgenstern's game theory	196
2. Nash's game theory	209
3. Schelling, Selten, and Harsanyi: their contributions to game theory	214
10. The axiomatization of utility theory and the analysis of risky decisions (1940-1980)	219
1. The axiomatization of utility theory	220
2. The axiomatic reconciliation between behaviorism and ordinalism	226
3. Expected Utility Theories: from Bernoulli to Savage	229
4. Expected utility paradoxes: Allais and Ellsberg	243
5. From paradoxes to Non-Expected Utility theories	250
11. The rise of behavioral economics (1980-2000)	251
1. General methodological features and «founding fathers»	252
2. Deconstructing standard preference theory	255
3. Prospect theory	259
4. Gul and Pesendorfer's criticism of behavioral economics	264
