

BERTRAND RUSSELL

Toward the “Principles
of Mathematics”

1900–02

Edited by
Gregory H. Moore

 **Routledge**
Taylor & Francis Group
LONDON AND NEW YORK

Contents

Illustrations	x
Abbreviations	xii
Introduction	xiii
Acknowledgements	xlix
Chronology	liii
PART I. DRAFTS OF <i>THE PRINCIPLES OF MATHEMATICS</i>	
General Headnote	3
1 <i>The Principles of Mathematics</i> , Draft of 1899–1900	9
Part I. Number	15
Part II. Whole and Part	35
Part III. Quantity	54
Part IV. Order	75
Part V. Continuity and Infinity	106
Part VI. Space and Time	142
Part VII. Matter and Motion	160
2 Part I of the <i>Principles</i> , Draft of 1901	181
3 Plan for Book I: The Variable [1902]	209
PART II. ABSOLUTE SPACE AND TIME	
General Headnote	215
4 Is Position in Time Absolute or Relative? [1900]	219
5 The Notion of Order and Absolute Position in Space and Time [1901]	234
6 Is Position in Time and Space Absolute or Relative? [1901]	259
PART III. AFTER PEANO: FOUNDATIONS OF MATHEMATICS	
General Headnote	285
7 On the Notion of Order [1901]	287
8 The Logic of Relations with Some Applications to the Theory of Series [1901]	310

9	Recent Italian Work on the Foundations of Mathematics [1901]	350
10	Recent Work on the Principles of Mathematics [1901]	363
11	Lecture II. Logic of Propositions [1901]	380
12	General Theory of Well-Ordered Series [1902]	384
13	On Finite and Infinite Cardinal Numbers [1902]	422
14	Continuous Series [1902]	431
15	On Likeness [1902]	437

PART IV. GEOMETRY

	General Headnote	455
16	Note [1902]	461
17	The Teaching of Euclid [1902]	465
18	Geometry, Non-Euclidean [1902]	470

PART V. GENERAL PHILOSOPHY

	General Headnote	507
19	Review of Schultz, <i>Psychologie der Axiome</i> [1900]	508
20	Leibniz's Doctrine of Substance as Deduced from His Logic [1900]	511
21	Review of Boutroux, <i>L'Imagination et les mathématiques selon Descartes</i> [1901]	535
22	Review of Hastie, <i>Kant's Cosmogony</i> [1901]	538
23	Do Psychological States Have Position in Space? [1902]	542

APPENDICES

I	Identity and Diversity	553
	I.1 Do Differences Differ?	555
	I.2 On Identity	557
	I.3 Logic Founded on Diversity	557
	I.4 On a Logic Founded on Diversity	558
	I.5 Logic Founded on Diversity	559
II	An Assault on Russell's Paradox	560
III	Notes on Implication and Classes	566
	III.1 Note on <i>all</i> and Formal Implication	567
	III.2 The Variable	567
	III.3 Note on Class	568
	III.4 Analytic Theory of $a \subset b$	568
	III.5 Classes, Implication, and Formal Implication	568
IV	French Text of Paper 5	570

V	Draft and French Text of Paper 8	589
v.1	On the Logic of Relations with Applications to Arithmetic and the Theory of Series	590
v.2	Sur la logique des relations avec des applications à la théorie des séries	613
VI	Outline of Paper 9	628
VII	Draft and French Text of Paper 12	630
VII.1	On the General Theory of Well-Ordered Series	631
VII.2	Théorie générale des séries bien ordonnées	661
VIII	French Text of Paper 16	674
IX	Geometry	676
IX.1	On Geometry and Dimensions	677
IX.2	Geometry in the 1901–02 Lectures	677
X	Logic and Methodology as a Subject for the B.Sc. Degree	680
XI	General Theory of Functions	686
	MISSING AND UNPRINTED TEXTS	691
	ANNOTATION	695
	TEXTUAL NOTES	755
	BIBLIOGRAPHICAL INDEX	821
	SYMBOLS INDEX	851
	GENERAL INDEX	865
