

# An Introduction to Biological Rhythms

by JOHN D. PALMER

Zoology Department  
University of Massachusetts  
Amherst, Massachusetts

With Contributions by

FRANK A. BROWN, JR.

Department of Biological Sciences  
Northwestern University  
Evanston, Illinois

and

LELAND N. EDMUNDS, JR.

Division of Biological Sciences  
State University of New York at Stony Brook  
Stony Brook, New York

**ACADEMIC PRESS** New York San Francisco London

A Subsidiary of Harcourt Brace Jovanovich, Publishers

# Contents

Preface	xi
Biographical Sketch of Frank A. Brown, Jr.	xv
Biographical Sketch of Leland N. Edmunds, Jr.	xvii

## **1 INTRODUCTION TO BIOLOGICAL RHYTHMS, THEIR PROPERTIES, AND CLOCK CONTROL**

Tidal, Daily, and Annual Rhythms	1
Rudimentary Terminology	6
Properties of Clock-Controlled Rhythms	7
The Coupling Unit	26
Master or Multiple Clocks	27
Summary and Conclusions	28
<i>Selected Readings</i>	30

## **2 A SURVEY OF RHYTHMS IN PLANTS AND ANIMALS**

Plants	31
Animals	60
Summary and Conclusions	90
<i>Selected Readings</i>	92

### **3 TIDAL (BIMODAL LUNAR-DAY) RHYTHMS**

A Survey of Tidal Rhythms	93
Determination of Phase	107
Summary and Conclusions	118
<i>Selected Readings</i>	119

### **4 HUMAN RHYTHMS**

Rhythms in Alcohol Metabolism	120
Rhythms in Pain Tolerance	122
Man as an Experimental Subject	123
Sleep-Wakefulness Rhythms	125
Temperature and Performance Rhythms	131
Rhythmic Moods	143
Cell Division Rhythms	143
Heart-Rate Rhythms	145
Rhythms in Renal Processes	149
Rhythms in Birth and Death Rates	153
Rhythmic Sensitivity to Allergens and Drugs	155
The Effect of a 10 Hz Electric Field on Human Rhythms	157
Longitudinal Travel and Biological Rhythms	160
Shift Work	169
Monthly Rhythms	169
Summary and Conclusion	173
<i>Selected Readings</i>	174

### **5 CLOCK COMPENSATED ANIMAL ORIENTATION**

Sun-Compass Orientation	175
Star-Compass Orientation	187
Moon-Compass Orientation	187
Summary and Conclusions	190
<i>Selected Readings</i>	191

### **6 THE CLOCK CONTROL OF PLANT AND ANIMAL PHOTOPERIODISM**

Plants	192
Animals	201
Summary and Conclusions	207
<i>Selected Readings</i>	208

### **7 EVIDENCE FOR EXTERNAL TIMING OF BIOLOGICAL CLOCKS**

#### **FRANK A. BROWN, JR.**

Comparison of the Internal and External Hypotheses	209
Rhythms in the Fiddler Crab	212

Translocation Experiment with Oysters	215
Statistical Analysis of Time Series	217
On the Absence of Constant Conditions	219
Responsiveness to Very Weak Magnetic Fields	222
Responsiveness to Very Weak Electric Fields	232
Responsiveness to Background Radiation	233
Geoelectromagnetic Fields and "Clocks"	236
Lability of the Rhythmic Cycles	239
Phase Maps and Phase Dissociation	241
Solar-Day and Lunar-Day Rhythms	244
Autophasing	247
Geophysically Dependent Rhythms	255
Precision of Solar-Day Cycles	261
Propensity for Lunar Periodisms	264
Annual Rhythms	270
External Timing as a Scientific Hypothesis	270
General Conclusions	273
Summary	276
<i>Selected Readings</i>	278

## **8 MODELS AND MECHANISMS FOR ENDOGENOUS TIMEKEEPING**

### **LELAND N. EDMUNDS, JR.**

Introduction	280
Formal Models for an Autonomous Clock	284
Cellular and Biochemical Clock Mechanisms	303
The Intrinsic versus Extrinsic Timing Problem	356
Summary and Conclusions	357
<i>Selected Readings</i>	359

Glossary	363
Index	367
