Preface	ix
1. Introduction	1
1.1. Priority among truths	1
1.2. Grounding, following from, and axiomatic science	3
1.3. Grounding – the general idea	6
1.3.1. Two cases	6
1.3.2. Six claims	12
1.4. Principles of interpretation	13
1.5. What I will not do in this book	15
1.6. Overview of the book	16
2. Objective truth, variation & truth-preservation	19
2.1. Introduction	19
2.2. The basic framework of the <i>WL</i>	20
2.2.1. Propositions and ideas	20
2.2.2. Concepts and intuitions	24
2.2.3. Form and truth	27
2.3. The logic of variation	34
2.3.1. Remarks on collections and notation	35
2.3.2. The definition of a variant	36
2.3.3. Universal validity and analyticity	39
2.3.4. Deducibility	43
2.3.5. Exact deducibility	48
2.4. Conclusion	53
3. Explanatory priority: Bolzano's pure logic of grounding	55
3.1. Introduction	55
3.2. Preliminaries	56
3.2.1. Existing reconstructions of Bolzano's theory	57
3.2.2. A remark on Bolzano's method of clarification	58
3.2.3. Grounding, deducibility, causation, and reasons of knowledge	60
3.3. Some basic distinctions	62

3.4.	Immediate grounding	68
3.4.1.	Irreflexivity, Aristotle's insight and uniqueness	68
3.4.2.	Interlude: a stronger uniqueness requirement	75
3.4.3.	Further properties of immediate grounding	79
3.5.	A more concise reconstruction	93
3.6.	Mediate grounding	98
3.6.1.	"Ascending from consequences to their grounds"	98
3.6.2.	Properties of mediate grounding	103
3.6.3.	Infinite grounding trees	104
4.	Simplicity and economy: Bolzano's impure logic of grounding	109
4.1.	Introduction	109
4.2.	Conceptuality, complexity and the existence of fundamental truths	113
4.2.1.	Conceptuality and complexity: <i>WL</i> , §221.1 & §221.2	113
4.2.2.	There are fundamental (conceptual) truths: <i>WL</i> , §221.3	117
4.2.3.	A different notion of complexity and the ideal of purity	120
4.3.	Economy Principles	126
4.3.1.	Grounding and deducibility	128
4.3.2.	Complete Ground Economy: <i>WL</i> , §221.5	134
4.3.3.	Partial grounds are logically independent and not logically analytic	143
4.3.4.	Partial Ground Economy: <i>WL</i> , §221.4	149
4.3.5.	A tension in Bolzano's theory of grounding	152
4.3.6.	Prospects for resolving the tension	155
4.3.7.	Global economy: <i>WL</i> , §221.3	160
4.3.8.	A principle for sciences?	171
4.3.9.	An argument for the Global Economy Principle	173
4.4.	The Generality Constraint: <i>WL</i> , §221.6	174
4.4.1.	A traditional principle rejected	175
4.4.2.	An alternative principle	177
4.4.3.	A proposal for an interpretation	179
4.5.	Jointly sufficient conditions for grounding: <i>WL</i> , §221.7	184
4.5.1.	The main idea	184
4.5.2.	Interpretation of (N1)–(N3)	187
4.5.3.	Another attempt	189
4.5.4.	Sufficient, but also necessary?	191
4.5.5.	Grounding preserved under variation	194
4.6.	Bolzano's tentative definition of grounding: <i>WL</i> , §221.note	196
4.6.1.	Introduction	197
4.6.2.	Interpretation of (DfG)	199
4.6.3.	Retaining local grounding, and a crucial problem	202

4.7. Fundamental truths revisited	204
4.8. Conclusion	210
5. Bolzano's logic of grounding and the logic of metaphysical grounding	215
5.1. General ideas and a crucial difference.	215
5.2. The pure logic of metaphysical grounding	218
5.3. The impure logic	223
5.3.1. Propositional and conceptual connectives	223
5.3.2. Quantifiers	229
5.4. Conclusion	231
6. Conclusion	233
A. Immediate predecessor	239
B. Bolzano's impure logic of grounding and Fine's truth-maker semantics	241
B.1. Principles and semantics	241
B.2. Proofs and discussion	244
B.3. An alternative	248
List of abbreviations	251
List of symbols, definitions, and principles	253
Bibliography	257
Index	266
