

# Contents

1	THE SCIENCE OF MOTION	3
	<i>Newtonian Mechanics, 4</i>	
	<i>The Experimental-Deterministic Philosophy, 8</i>	
	<i>The Twentieth Century, 9</i>	
2	THE HISTORY OF ATOMISM	13
	<i>Origins of the Atomic Concept, 13</i>	
	<i>The Chemical Atoms, 14</i>	
	<i>The Molecules of the Physicists, 17</i>	
	<i>The Coming of the Atomic Age, 19</i>	
3	ATOMIC STRUCTURE	24
	<i>Size, Mass and Motion, 24</i>	
	<i>Discovery of the Electron, 26</i>	
	<i>The Atom Models of Thomson and Rutherford, 29</i>	
	<i>The Bohr Atom Model, 34</i>	
4	RADIANT ENERGY	40
	<i>Light Waves, 40</i>	
	<i>Interference of Light Waves, 46</i>	
	<i>Light Particles, 48</i>	
	<i>The Bohr Theory of Atomic Radiation, 55</i>	

5	CONSEQUENCES OF THE WAVE-PHOTON CONCEPT	61
	<i>Waves and Particles</i> , 61	
	<i>Causality and Probability</i> , 66	
6	MATTER WAVES	70
	<i>A New Mechanics</i> , 70	
	<i>Particles and Waves</i> , 79	
	<i>Waves and Atoms</i> , 81	
7	THE PRINCIPLE OF UNCERTAINTY	91
	<i>Wave Packets</i> , 91	
	<i>Precision of Measurement</i> , 95	
	<i>Further Implications of Quantum Mechanics</i> , 101	
8	APPLICATIONS AND CONCLUSIONS	103
	<i>The Particle in a Box</i> , 103	
	<i>Natural Radioactivity</i> , 108	
	<i>The Solid State</i> , 114	
	<i>Seeing with de Broglie Waves</i> , 117	
	<i>Out of the Atomic Substratum</i> , 118	
9	ELEMENTARY PARTICLES	120
	<i>Transmutation of Elements</i> , 120	
	<i>Particles and More Particles</i> , 125	
	<i>Discovering Particles</i> , 127	
	<i>Particle Accelerators</i> , 130	
	<i>Studying Particles</i> , 136	
10	ORGANIZATION OF PARTICLES	139
	<i>A Table of Particles</i> , 139	
	<i>The Leptons</i> , 141	
	<i>The Mesons</i> , 144	
	<i>The Baryons</i> , 144	
	<i>Antiparticles</i> , 145	

11	PARTICLE CHARACTERISTICS	149
	<i>Forces</i> , 149	
	<i>Conservation Laws and Stability</i> , 152	
	<i>Conservation Laws and Probabilities</i> , 160	
	<i>Strangeness and Isotopic Spin</i> , 161	
	<i>Resonances</i> , 165	
	<i>Summary of Particle Experiments</i> , 169	
12	IDEAS AND THEORIES	173
	<i>Quantum Field Theory</i> , 173	
	<i>The Electrostatic Field</i> , 177	
	<i>The Strong-Force Field</i> , 179	
	<i>Action at a Distance</i> , 181	
13	SYMMETRIES	184
	<i>Symmetries and Conservation Laws</i> , 184	
	<i>The Nonconservation of Parity</i> , 187	
	<i>Group Theory</i> , 191	
	<i>Quarks</i> , 195	
14	MORE THEORIES	198
	<i>S-Matrix Theory</i> , 198	
	<i>Feynman Diagrams</i> , 199	
	<i>Particle Energy Levels</i> , 204	
	<i>Space and Time</i> , 208	
	<i>Summary of Particle Theories</i> , 214	
15	PHILOSOPHICAL IMPLICATIONS OF THE NEW PHYSICS	218
	<i>Science and Philosophy</i> , 218	
	<i>Spiritual Values in the Old and the New Physics</i> , 221	
16	CAUSALITY	248
	<i>Causality in Philosophy</i> , 248	
	<i>Causality in Classical Science</i> , 254	

17	FREE WILL	264
	<i>The Free Will Problem</i> , 264	
	<i>The Nature of the Will</i> , 272	
	<i>Free Will and Causality</i> , 280	
	<i>Ethical Problems</i> , 286	
18	DETERMINISM, FREE WILL AND THE NEW PHYSICS	289
	<i>Laplace versus the Uncertainty Principle</i> , 289	
	<i>Diverse Interpretations</i> , 295	
	<i>Criticisms</i> , 297	
	GLOSSARY OF SCIENTIFIC TERMS	303
	FOR ADDITIONAL READING	315
	INDEX	321
